Solidliquid Separation Equipment Selection And Process Design:

Solid/Liquid Separation: Equipment Selection and Process Design Steve Tarleton, Richard Wakeman, 2006-12-07 In this volume the third in a set specifically written for the industrial process and chemical engineer the authors provide the detailed information on filtration equipment and media which allows the reader to then consider the pre treatment of suspensions selection of the most appropriate equipment for the task data analysis and the subsequent design of the processes involved for particular separations The result is a comprehensive book which is designed to be used frequently and referred to regularly in order to achieve better industrial separations Successful industrial scale separation of solids from liquids requires not only a thorough understanding of the principles involved but also an appreciation of which equipment to use for best effect and a start to finish plan for the various processes involved in the operation If these factors are all correct then successful separations should result Part of 3 volume set Unique approach to industrial separations Internationally known authors **Solid** E.
