spraying the paint the more important part of painting is the preparation on the surface for painting once you have prepared the surface well then only you can get good results believe me even a slight flaw in your prep will show once you spray the paint So the moral is you will need lots of patience while doing this you will get errors you will mess up somewhere but that is the part of learning if you mess up somewhere that doesn't mean that you will not be able to do it I have messed up many times and I have learned well from it believe me this mess will make you a better painter This guide will give you all the information that you will need to do basic bodywork like removing the dents laying the primer sanding the surface for painting and laying the clear coat The major topic I want to discuss here is safety most people neglect this topic and then finally end up in a hospital and that is the end of their career Make safety your first priority as you will be dealing with harmful chemicals here so make sure you protect your lungs and hands properly always wear respiratory mask and gloves while handling paints thinners reducers primers hardeners and clear coats etc and of course use your common sense Preparing the body for painting is the most important stage in any paint job if you did not prepare your body well then for sure that you will not get good results This book can take you to the professional level if you follow each and everything from it carefully It is a complete step by step guide on how to spray paint your bike car or just anything else The process is the same for everything you just have to know the right process and paint like a professional This book will cover topics on Safety Tools you will need Body preparation Applying putty Laying primers Spray painting tips and tricks Colour sanding and buffing The simple Spray Painting Multimedia E Book training EVER *Paint and Coating Testing Manual* ,
