Sanchez, Heather Glynn Crawford?Ferre, 2017-06-01 Science technology engineering and mathematics STEM disciplines play a pivotal role in societal progress and economic prosperity in addition to enhancing individual lives However U S students lack strong STEM performance in an international context The pool of STEM proficient workers is thus insufficient to fuel the nation with females being one group that is noticeably absent Out of school time OST programs which are on the rise are increasingly suggested as a way to support and encourage females in STEM Data collected from participants in OST programs have shown improved achievement interest and confidence in STEM as well as greater awareness of STEM role models and careers Out of School Time STEM Programs for Females Implications for Research and Practice features seven OST STEM programs for females from across the United States that run one week to one year in length In this book the chapter authors describe their programs the effectiveness of those programs and practical implications of their program evaluation data This book is the first of its kind to offer researchers educators school administrators policy makers and others detailed insight into the promise and practice of out of school time STEM programs for females **The Business School Buzz Book** Carolyn C. to the individualization of learning that some authors argue has been the case thus far **Community Care** ,1944
