State And Religion In China:

State and Religion in China Anthony C. Yu, 2005 In *State and Religion in China* Anthony Yu takes a fresh look at Chinese religion and its relation to politics. He argues against those who claim that Chinese politics has been traditionally secular or even that the Chinese traditionally had no religion; that religion has deep roots in the Chinese past and that the Chinese state has from its creation always interfered in religious matters. Jacket Making Religion, Making the State Yoshiko Ashiwa, David L. Wank, 2009 This volume combines the perspective of religion as a constructed category of modernity with the analytic focus and empirical grounding of institutional social science to develop a new approach to the study of state and religion in modern and contemporary China. *Religious Diversity and Public Religion in China* Zhibin Xie, 2006 This book addresses the issue of public religion and its implications in Chinese society. Zhibin Xie explores various normative considerations concerning the appropriate role of religion in public political life in a democratic culture. Besides drawing on the theoretical discourse on religion in the public sphere from Western academics, it holds that the issue of religion in Chinese politics should be addressed by paying attention to characteristics of religious diversity and its political context in China. This leads to a position of liberal constrained public religion in China which encourages religious contribution to the public sphere as a substantial component of religious liberty in China on the one hand and proposes some constraints both upon government and religions for regulating religious political discourse on the other. **Religion and Nationalism in Chinese Societies** Cheng-tian Kuo, 2025-10-01 This book explores the interaction between religion and nationalism in the Chinese societies of mainland China, Taiwan, and Hong Kong. Cheng-tian Kuo analyses the dominant religions including Chinese Buddhism, Tibetan Buddhism, Daoism, Christianity, Islam, and folk religions, but he also goes beyond that, showing how in recent decades the Chinese state has tightened its control over religion to an unprecedented degree. Indeed, it could almost be said to have constructed a wholly new religion: Chinese Patriotism. The same period, however, has seen the growth of democratic civil religions which could challenge the state. **Handbook of the History of Religions in China I** Zhongjian Zhan, Jian Mu, 2020-10-27 This book is part of an initiative in cooperation with renowned Chinese publishers to make fundamental formative and influential Chinese thinkers available to a western readership, providing absorbing insights into Chinese reflections of late and offering a chance to grasp today's China. In their influential book *Handbook of the History of Religions in China*, Zhongjian Mou and Jian Zhang present a panorama of the religions existing in China through time. In their fascinating *History*, they delineate the emergence and development of Daoism, Buddhism, Confucianism, Islam, and Christianity and explore the roles they played in Chinese society and the interrelations between them. In China, also due to the encompassing Confucian idea of living together harmoniously while maintaining differences, religions, including newly arrived ones, came closer together than anywhere else in the world and reached a unique level of peaceful societal coexistence. Despite many frictions and conflicts, communication and reconciliation were indisputably predominant in China throughout

history Buddhism was peacefully introduced into China and later on a harmonious symbiotic syncretism of Confucianism Buddhism and Daoism developed an exemplary process of how a diverse set of different religions can complement each other and contribute to a better life *State, Society and International Relations in Asia* Mehdi Parvizi Amineh, 2010 In this timely volume M Parvizi Amineh brings together a multitude of studies of modern Asian postcolonial states and societies This part of the world has undergone major transitions over the past decade and is quickly becoming a major player in international policy and the global economy Grounded in the most recent scholarship *State Society and International Relations in Asia* covers several large scale global concerns including nationalism democratization corruption religious tension globalization and regionalization *Changing State-Religion Dynamics in Xi Jinping's China* Mohammed Al-Sudairi, 2017-01-01 The main purpose of this report is to offer readers an overview of new developments that have taken place in China with respect to the party state s management of Islam as well as the consequences of these new developments for Sino Saudi relations The report is organized into four sections The first section discusses the authoritarian turn under way in China which serves to contextualize the new religious controls as the backdrop of a system wide transformation The second section looks at the party state s traditional approach towards the religious sphere and the mechanisms of control it employs towards it The third section highlights some of the changes that have taken place in the party state s management of the religious sphere It demonstrates the departures from traditional approaches of control especially with regards to Islam and discusses some of the factors that have contributed to altering the party state s attitudes including for example Saudi Arabia s perceived role in promoting religious subversion The last section considers some of the consequences this may carry for the future development of SinoSaudi relations and offers in turn a few policy recommendations aimed at avoiding such outcomes

Religious Identities and the Global South Felix Wilfred, 2021-01-04 This book offers a comprehensive and interdisciplinary account of religious identities in the Global South Drawing on literature in various fields Felix Wilfred analyzes how religious identities intersect with the processes of globalization modernity and postmodernity He illustrates how the study of religion in the Global North often revolves around questions of secularism and fundamentalism whereas a neo Orientalist quality often attends study of religion in the Global South These approaches and theorizing fail to incorporate the experiences of lived religion in the South especially in Asia Historically the religions in the South have played a highly significant role in resistance to the domination by the colonial forces an important reason for the continued attachment of the peoples of the South to their religious universe This book puts the two regions and their scholarly norms in conversation with one another exploring the social political cultural and economic implications

God and Caesar in China Jason Kindopp, Carol Lee Hamrin, 2004-04-21 In the late 1970s when Mao s Cultural Revolution ushered in China s reform era religion played a small role in the changes the country was undergoing There were few symbols of religious observance and the practice of religion seemed a forgotten art Yet by the new millennium China s government reported that more than 200 million religious believers worshiped in 85 000 authorized

venues and estimates by outside observers continue to rise The numbers tell the story Buddhists as in the past are most numerous with more than 100 million adherents Muslims number 18 million with the majority concentrated in the northwest region of Xinjiang By 2000 China's Catholic population had swelled from 3 million in 1949 to more than 12 million surpassing the number of Catholics in Ireland Protestantism in China has grown at an even faster pace during the same period multiplying from 1 million to at least 30 million followers China now has the world's second largest evangelical Christian population behind only the United States In addition a host of religious and quasi spiritual groups and sects has also sprouted up in virtually every corner of Chinese society Religion's dramatic revival in post Mao China has generated tensions between the ruling Communist Party state and China's increasingly diverse population of religious adherents Such tensions are rooted in centuries old governing practices and reflect the pressures of rapid modernization The state's response has been a mixture of accommodation and repression with the aim of preserving monopoly control over religious organization Its inability to do so effectively has led to cycles of persecution of religious groups that resist the party's efforts American concern over official acts of religious persecution has become a leading issue in U S policy toward China The passage of the 1998 International Religious Freedom Act which institutionalized concern over religious freedom abroad in U S foreign policy cemented this issue as an item on the agenda of U S China relations God and Caesar in China examines China's religion policy the history and growth of Catholic and Protestant churches in China and the implications of church state friction for relations between the United States and China concluding with recommendations for U S policy Contributors include Jason Kindopp George Washington University Daniel H Bays Calvin College Mickey Spiegel Human Rights Watch Chan Kim kwong Hong Kong Christian Council Jean Paul Wiest Chinese University of Hong Kong Richard Madsen University of California San Diego Xu Yihua Fudan University Liu Peng Chinese Academy of Social Sciences and Carol Lee Hamrin George Mason University

State-Religion Relationships and Human Rights Law Jeroen Temperman, 2010 This book presents a human rights based assessment of the various modes of state religion identification and of the various forms of state practice that characterize these different state religion models This book makes a case for the recognition of a state duty to remain impartial with respect to religion or belief in all regards so as to comply with people s fundamental right to be governed at all times in a religiously neutral manner As this book demonstrates through the various case studies there is increasing interest and concern at the manner in which questions concerning the enjoyment of the right to the freedom of religion or belief bear upon key questions concerning the governance of democratic society Issues raised involve matters concerning employment education expression association and more generally the interface between religion and political life The existing literature often traces these concerns back to the need to consider the place of religion in contemporary society but leaves matters there Another body of academic literature explores the theoretical dimensions of that relationship but fails to connect it to the practice of states in order to test out the propositions which are the product of these reflections The great virtue of this work is that it seeks to unite these various enterprises and engages head on with the challenges which this produces The aim is to demonstrate and illustrate the key contention that there is an emergent right to religiously neutral governance and that this is incompatible with the continuation of systems which offer preference to particular forms of belief system religious or otherwise A chief virtue of this book is that it works through the consequences of this claim in a fearless fashion posing challenges for those states which continue to use their legal frameworks to offer

support directly or indirectly for historical dominant or favoured forms of religion or belief It challenges received assumptions and by driving the logic of contemporary human rights thinking to the foundations of state religion relationships performs a valuable service for those engaging with this most difficult and timely of questions Malcolm D Evans Professor of Public International Law University of Bristol
