Health, Healing, and Shalom Bryant L. Myers, Erin Dufault-Hunter, Isaac B. Voss, 2015-11-17 Frontiers and Challenges for Christian Healthcare Missions Ever since Jesus's proclamation in word and deed as the Great Physician his followers in mission have assumed that salvation and health are intertwined Yet for every age Christians need to examine how they can best announce the gospel message of God's healing in word and deed in their own context In our era we are often simultaneously grateful for modern medicine and frustrated by its inability to care for the whole person in effective affordable ways In this edited volume authors with an interest in health missions from a wide variety of experiences and disciplines examine health and healing through the theological lens of shalom This word often translated peace names a much more complex understanding of human well being as right relationships with one another with God and with creation Reading various aspects of healthcare missions through these glasses not only yields much needed correctives to current practice but also exposes the Spirit's invitation to participate in God's ongoing work of tending caring and healing our broken world

Healing War Trauma Raymond Monsour Scurfield, Katherine Theresa Platoni, 2013-02-11 Healing War Trauma details a broad range of exciting approaches for healing from the trauma of war The techniques described in each chapter are designed to complement and supplement cognitive behavioral treatment protocols and ultimately to help clinicians transcend the limits of those protocols For those veterans who do not respond productively to or who have simply little interest in office based regimented and symptom focused treatments the innovative approaches laid out in Healing War Trauma will inspire and inform both clinicians and veterans as they chart new paths to healing

First Responder Trauma Recovery Guide and Workbook (First Edition) Kevin William Grant, 2021-07-14 Stress anxiety depression trauma post traumatic stress disorder PTSD bullying and burnout have all become accepted realities for first responders in the modern workplace This workbook unpacks contemporary workplace realities educates you about trauma and helps you build your personalized recovery plan for transformation recovery and healing This recovery program has eight core

purposes Validate your current situation This recovery program begins by validating your experiences and breaking through any denial you may be experiencing by examining all the ways you could be traumatized at work Identify your realities Once you understand how you've been traumatized you'll learn about how trauma develops and how to break through the defenses that protect you from the painful experiences you're facing Understand workplace trauma Armed with a deeper understanding of what trauma is how it develops and how you react to trauma you will be able to identify the support you'll need to heal and recover Build your recovery team and develop your action plan Useful tools and techniques will help you connect with and build your team of support professionals and advocates Once you begin working with your team you'll start the recovery process by acquiring a set of skills and techniques to help you weather the storm and begin healing Grieve mourn and let go Recovery will take you on a journey of grieving mourning and letting go which will transport you to a new sense of calm and acceptance I'll break down this journey into the stages you'll travel through to get to the other side Maintain your recovery Finally I'll share helpful ways to maintain your recovery manage setbacks with compassion and track your progress so you can proactively navigate the inevitably choppy waters as you continue your healthy and productive recovery Adapt and adjust to the impacts of the COVID 19 Pandemic The COVID 19 global Pandemic has left a lasting impact on all our lives This section will review the Pandemic's mental health physical health and social implications with helpful tools and techniques to help you manage the trauma and stress the Pandemic brings In addition gems of wisdom and learnings within the research literature will help you navigate the Pandemic and Post Pandemic worlds effectively Learn interactively with workbook exercises Workbook exercises will help you digest the content reflect on your situation learn from that reflection and incrementally create a personalized recovery plan Each exercise in the workbook walks you through a process of self reflection and self discovery to help you understand and make sense of your situation First Responder Careers Expose Individuals to Higher Risks of Developing Trauma Some careers include a higher likelihood of experiencing traumatic events that can lead to the development of PTSD Serving in the military is a high risk factor for developing PTSD However combat veterans develop PTSD at different rates depending on the severity and length of exposure to traumatic experiences There are also high incidences of reported sexual harassment and sexual abuse in the military As a result the rates of PTSD are relatively high compared to the overall prevalence in the general population Not only can law enforcement officers experience direct threats and stressful conditions but they also regularly witness the devastating effects of assaults robberies kidnappings and violent events However individuals in this profession have lower than expected rates of PTSD surprisingly An estimated 20 percent overall may result from having access to counseling and rigorous pre employment screenings EMTs and paramedics are routinely exposed to life threatening incidents and have more health problems than individuals in other occupations PTSD rates in this group are as high as 20 percent PTSD prevalence in this profession is comparable to law enforcement Firefighters conduct paramedic activities and are the first responders to natural disasters

Firefighting is a dangerous profession that exposes workers to stressful conditions and traumatic events ranging from threats to their safety and experiencing the devastating effects of catastrophes. As a result, the prevalence of PTSD in this group can be as high as 20 percent. Volunteer firefighters may have even higher rates because they don't have access to the same level of support as career firefighters. Healthcare workers, especially those working in emergency rooms and intensive care units, are also at higher risk. For example, nurses working in critical care units are more likely to develop PTSD than nurses in other groups. In addition, while senior level nurses report fewer PTSD symptoms than junior ones, they report higher rates of burnout. Finally, healthcare workers exposed to patients that have experienced violence, such as an assault victim, are more likely to develop PTSD than surgeons who treat assault victims. Rescue workers, medical workers, and volunteers who act as first responders during disasters witness the aftermath of horrific events and can even become involved in severe traumatic events. The prevalence of PTSD in these individuals has been estimated to be between 15 and 30 percent. Journalists who work as war correspondents are at higher risk of being injured, killed, or kidnapped. Their lifetime prevalence of PTSD, which can be as high as 30 percent, reflects their lack of access to support and PTSD treatment options. Transit and train operators are frequently exposed to physical threats and witness suicide incidents, such as person under train events. Exposure to these traumatic and threatening circumstances can be a daily or weekly occurrence. Bus drivers are more prone to PTSD because they have more direct contact with the general public than train drivers locked in secure train cabs. In these high-risk professions, the incidence of trauma declines when policies are in place to debrief victims, give victims immediate access to counseling, and screen for individuals at high risk of having adverse reactions to traumatic conditions.

Gun Violence, Disability and Recovery Cate Buchanan, Editor, 2014. Gun violence, intentional self-directed or accidental, is a profoundly traumatic experience. From physical injuries to unseen psychological scars and permanent impairments, it irrevocably changes people's lives. Gun violence does not just affect the individual shot or threatened. Secondary victimisation also includes relatives, friends, colleagues, caregivers, and perhaps controversially, perpetrators themselves. *Gun Violence, Disability and Recovery* provides the first overview of the rights and needs of survivors of gun violence. The collection contains contributions from gun violence survivors, trauma surgeons, disability rights activists, rehabilitation specialists, violence prevention and reduction experts, development practitioners, and gender justice advocates. From countries with low resource levels to those already equipped with state-of-the-art rehabilitation centres, this innovative publication provides policymakers, practitioners, government officials, and donors with timely analysis on what could be done differently to meet the needs and rights of survivors of gun violence. This volume speaks to me both as a government official and as a survivor of gun violence. I know first-hand how painful the aftermath of such a life-changing event can be. But I also know it is possible to recover and make a positive difference in society. I hope this book will inspire other survivors to follow this path.

Len n Moreno Garc s Vice President Ecuador. Little attention has been paid to the fact that for every person killed by gun violence, as many as six

victims will survive often with severe disabilities The long term physical and psychological damage social and economic impacts can no longer be overlooked Bringing together voices of survivors as well as health medical rehabilitation and legal concerns this book represents a significant step forward outlining key issues for policy practice and intervention It is a must read for anyone concerned about human rights and violence and that should mean all of us Nora Ellen Groce Director Leonard Cheshire Disability Inclusive Development Centre University College London UK Every year hundreds of thousands of victims of gun violence together with their families experience the real costs of the availability and misuse of arms in our communities For these victims to attain their basic human rights so often denied them we need a better understanding of their predicament challenges and needs Gun Violence Disability and Recovery with its comprehensive overview and analysis will critically inform our efforts to develop and implement better policies and practices to enhance the realisation of the rights of survivors of armed violence including implementation of the Arms Trade Treaty Espen Barth Eide former Minister of Foreign Affairs Norway The reality of survivors of gun violence my reality is so often lost in narrow political and economic interests This volume gives me hope that attention to life after gun violence will begin to receive long overdue attention and contribute to the long haul effort of improving services for survivors as well as working towards accountability about the arms trade Shelley Barry filmmaker South Africa International development goals including the Millennium Development Goals will not be achieved if the rights of people with disabilities are not met Through a broad range of case studies and examples from low and middle income countries this book shows us how States could do better Let us hope that its message is heard As a survivor of gun violence myself I take a keen interest in any effort to effect gun control particularly across Africa This is the
