The Speculative Route Merve Tabur, Sami Ahmad Khan, 2025-08-29 The Speculative Route explores speculative traditions and science fictional modes across South and Southwest Asia and North Africa SSWANA examining their historical connections inter and intra regional entanglements overlaps and differences Conceptualizing science fiction and fantasy SFF as a mode rather than a genre this volume challenges the putative boundaries between literary and genre fiction through critical studies and essays focusing on SFF from Bangladesh Egypt India Iran Pakistan Palestine Sri Lanka and Turkey It demonstrates the ways in which science fictional modes of thinking and imagination function as critical tools for addressing social cultural and political issues beyond genre conventions and expectations Bringing together articles by leading scholars of SFF and think pieces by acclaimed authors of contemporary SF this volume focuses on central themes such as the relationship between aesthetics and politics alterity world building memory trauma colonialism and decolonization ecology gender religion and mythopoetics It engages with the past present and future of speculative traditions in SSWANA and compares the visions that emerge from these seemingly disparate but historically connected entities Part of the Studies in Global Genre Fiction series this volume will be of great interest to academics students and practitioners in the fields of genre studies notably SF SFF comparative literature media and popular culture area studies postcolonial studies and future studies as well as to readers who are interested in exploring SFF works from the Global South [Comparative Legal Frameworks for Pre-Implantation Embryonic Genetic Interventions](#) Pin Lean Lau, 2019-08-01 This book discusses the possibilities for the use of international human rights law and specifically international biomedical laws related to the protection of human rights and the human genome to provide a guiding framework for the future regulation of genetic modifications applied to human embryos and other precursor materials when these are made with the aim of implanting a genetically altered embryo in a woman The significance and timeliness of the work derives from the recent availability of CRISPR Cas9 and other gene editing tools and from lacunae in international law regarding the legality of embryo modification with these tools and appropriate governance structures for the oversight of resulting practices The emergence of improved genome editing tools like CRISPR Cas9 holds the promise of eradicating genetic diseases in the near future But its possible future applications with Pre Implantation Genetic Diagnosis PGD raises a plethora of legal and ethical concerns about remaking future human beings The work aims to address an urgent call to embed these rising concerns about biomedical advancements into the fundamental tailoring of legal systems Suitable regulatory approaches coupled with careful reflection of global biomedical laws and individual constitutional systems must be explored The Book analyzes the impact of reproductive biomedical technologies on the legal and ethical dimensions of regulatory frameworks in selected constitutional systems like the US the UK Australia Malaysia and Thailand Employing a comparative law methodology the work reveals a dynamic intersection between legal cultures socio philosophical reasoning and the development of a human rights based framework in bio political

This book conceptualizes an enriching engagement with questions pertaining to the notion of technology and how its blend with cultural facets makes comprehensive room for the reconstitution of the literary landscape in Atwood's science fiction SF novels. Ranging from the technologies of disciplinary and bio-corporeal power to theorizing gender politics of cyborgian nomadic and humanoid bodies, from technologizing the consumption of hybrid edibles and lingual epistemology to discerning the hyperreal dimensions of archived tech memoirs, video gaming, and digital sex, the book takes a philosophical approach to technocultural studies, a newly emerging interdisciplinary methodology. It contributes to an optimal concretization of technoscientific exploration in Margaret Atwood's literary scholarship and adds to the existing field of theoretical acumen within cosmopolitan literatures.
