Nicogossian, Richard S. Williams, Carolyn L. Huntoon, Charles R. Doarn, James D. Polk, Victor S. Schneider, 2016-12-13 As space medicine evolved from the late 1950s onward the need arose for a ready reference for students and practitioners on the basic concepts of this new specialty Through three editions edited by leaders in the development of space medicine this classic text has met the need This fourth edition of Space Physiology and Medicine provides succinct evidence based summaries of the current knowledge base in space medicine and serves as a source of information on the space environment responses and practices Additionally there is extensive online material available for each chapter featuring overviews and self study questions **The Partnership** Edward Clinton Ezell, Linda Neuman Ezell, 2013-01-16 The 1975 Apollo Soyuz Test Project ASTP was the first joint U S Soviet space flight in which teams from the two nations met in orbit to test an international docking system and conduct both collaborative and independent studies Although primarily a symbol of international goodwill the mission provided useful experience for future cooperative ventures between the two nations This authorized NASA history features many fascinating interviews with participants as well as firsthand observations of ASTP activities Because details of the Soviet space program

remained shrouded in secrecy during the ASTP the story is told from the American perspective No scientific background is necessary to appreciate the narrative which focuses on the participants working relationships rather than the technical aspects of their jobs Starting with the early years of the Cold War competition it traces the formation of an alliance between NASA and Soviet Academy engineers in developing a test project training the crew and the triumphant flight Eighty six pages of photographs include twelve full color pages with images of Earth from space
