**Spatial Diversity and Dynamics in Resources and Urban Development** Ashok K. Dutt, Allen G. Noble, Frank J. Costa, Sudhir K. Thakur, Rajiv Thakur, Hari S. Sharma, 2015-10-15 This double volume work focuses on socio demographics and the use of such data to support strategic resource management and planning initiatives. Papers go beyond explanations of methods, technique and traditional applications to explore new intersections in the dynamic relationship between the utilization and management of resources and urban development. International authors explore numerous experiences, characteristics of development and decision making influences from across Asia and Southeast Asia as well as recounting examples from America and Africa. Papers propound techniques and methods used in geographical research such as support vector machines, socio economic correlates and travel behaviour analysis. In this volume the contributions examine issues such as natural resource and environmental management, livelihoods issues in the context of climate change, land markets and land trusts, adaptive management of wildlife sanctuaries, ground water scarcity, flood hazards and flood plain management, non conventional energy resources, community forestry and management and land use and land cover change. The significance of these topics lie in the pace and volume of change as is reflected through continued development within established fields of inquiry and the introduction of significantly new approaches during the last decade. Readers are invited to consider the dynamics of spatial expansion of urban areas and economic development and to explore conceptual discussion of the innovations in and challenges on urbanization processes, urban spaces themselves and both resource management and environmental management. Together the two volumes contribute to the interdisciplinary literature on regional resources and urban development by collating recent research with geography at its core. Scholars of urban geography, human geography, urbanism and sustainable development will be particularly interested in this book. *Resource Management, Sustainable Development and Governance* Baleshwar Thakur, Rajiv R. Thakur, Srikumar Chattopadhyay, Rajesh K. Abhay, 2022-01-01 This book examines the relationship between natural resource management, sustainable development and governance with case studies from India and other places covering disaster risk reduction, conflict resolution, capacity building, climate change adaptation and resilience, citizen engagement and ecological conservation. Though the studies focus mostly on cases in India, the volume discusses how governance can be employed to help develop and implement sustainable practices globally through the lens of the United Nations Sustainable Development Goals (SDGs) framework. Readers will learn how to integrate concepts of resource management, sustainable development and governance to improve human resilience to global environmental change and to assess the proper development approaches to assist economically stressed and resource deprived individuals. The book will be of use to graduate students and academics, policy makers, planners and nonprofits.

involvement of local communities in the protection conservation and management of public forests to prevent degradation through sustainable practices while still responding to the basic social and economic needs of local populations When the people who depend on forest resources for their livelihoods are jointly responsible for managing and protecting them they tend to do so in a more sustainable manner by focusing on the long term benefits rather than the immediate short term gains However when tenure rights are weak unclear or insecure or offer limited benefits people are incited in extracting more immediate benefits resulting in suboptimal forest management and the reduction of carbon stocks Features case studies that cover issues such as rising levels of deforestation forest degradation regional food security ecosystem degradation biodiversity loss conflicts over natural resource use water management issues and impacts on local communities Includes contributions from local researchers who are dealing with these issues first hand and on a daily basis Includes a comparative review on REDD implementation in different communities Focuses on sustainability issues across the region Space Law Principles and Sustainable Measures Hamid Jahankhani, Stefan Kendzierskyj, Sina Pournouri, Maria A. Pozza, 2024-09-14 This book helps to bridge the knowledge gap that currently surrounds space technology and its method of exploration and highlights much needed awareness and attention to an increase in Space Law and sustainable measures The ever increasing usage of space based solutions by both public and commercial entities is producing congestion in the radio frequency spectrum as well as orbital slots The inevitable commercialization of satellite technology will certainly result in a proliferation of privately owned and managed satellite spacecraft in low Earth orbits Cyber vulnerabilities in the Air Force and the DoD frequently ignore satellite ground systems Space ground system cyber security assaults and investigations include those involving satellite control communications terminal hacking and GPS spoofing A continuous cyber security assessment technique is required for space systems to identify assess reduce and address sophisticated cyber threats Risk based compliance regular cybersecurity risk assessments and a renewed focus on the elimination of system flaws at the time of design are all necessary for space ground and control systems Due to the absence of a rigid regulatory framework satellites play a significant part in the production of space debris which is a source of increasing worry Such debris manufactured artificially contributes greatly to the destruction of the environment in Earth's orbit There is not a single framework in existence that can appropriately govern contemporary concerns like the security of satellite data and debris in orbit The Department of Defence DoD is now responsible for monitoring all objects in space however it cannot require satellite operators to take precautions against potential collisions **Feminism, Diversity and HRD** Beverly Dawn Metcalfe, Yasmeen Makarem, 2024-06-18 Feminism Diversity and HRD aims to enhance critical understandings of feminism diversity and HRD theorization and practice in the global political economy This involves addressing race class and intersectional approaches to evaluating inequalities in society organizations The book will bring together cutting edge analysis to offer a critical interdisciplinary overview of the feminism diversity and HRD debates that are only just emerging

Crucially it will offer new insights on the governance and policy making dimensions of national HRD and the gender agendas advocated by global institutions which are influenced by social justice themes In this respect the contributions in this volume offer more than just a tried and tested analysis of the political knowledge and skill gap problems that face organizations and nation states Rather they are agenda setting and forward looking since they critically consider what the HRD solutions currently on offer are and how they can be further improved Thus the contributions will cover theoretical and policy perspectives not previously covered in a critical text of this kind
