This inspiring book reveals the invisible inner landscapes of how educators teach children from a variety of backgrounds to meet the challenging expectations of today's standards without sacrificing support for their developmental needs or their diverse ways of learning. Featuring images of possibility from an urban school, it describes effective child-centered teaching in pre-K through fifth grade. Each image is analyzed for the educational decisions that took place to make the experience effective, including the planning involved, the classroom environment and routines that supported it, how standards were addressed, how the teacher assessed student learning to shape instruction, and the impact on students. This practical resource is a must read for pre and in-service teachers and anyone committed to helping inner-city children succeed in school and beyond.

Authored by in-service teachers around the country, this book showcases a variety of brain-based approaches, cutting-edge yet intuitive evidence-based yet accessibly translated to helping children realize their potential at school. Both novice and veteran K-12 teachers alike will be reinvigorated to enhance students' engagement and curiosity, nurture positive behaviors and self-regulation, support interest-based activities and inclusive interactions, identify biases and struggles, and more.
