Companje, R.H.M. Hendriks, K.F.E. Veraghtert, B.E.M. Widdershoven, 2025-10-01 Today health insurance is a key component in the system of social security in most European Union countries In many of these countries modern health insurance funds and healthcare insurers play an essential role in implementing the public health insurance system Many of these health insurance funds have a long and fascinating history of which clear traces can be seen today in the organisation and structure of health insurance as well as health insurance funds and insurers In Two centuries of solidarity the authors compare the systems of health insurance health insurance funds and healthcare insurers in Germany Belgium and the Netherlands Given the similar political economic and social development that these countries have undergone in the past 60 years and the availability of a qualitatively high level of health care one might expect a high degree of similarity between these countries

healthcare insurance systems However the dissimilarities are surprising In fact these differences are currently becoming ever more apparent between systems in general and the structure and operation of the health insurance funds and health care insurers in particular The differences include the compulsory nature of insurance the extent of coverage premiums entrepreneurship competition and the degree of private insurance Many of these national singularities can be understood and explained only by considering the historical background of the health insurance systems the insurers and their evolution over the past two centuries This study adopts an institutional and political perspective towards a further understanding of the development of health insurance and of how this ultimately determined the specific nature of the healthcare insurers and funds and the way they currently operate in Germany Belgium and the Netherlands Voor de bevrijding van de arbeid Ger Harmsen,Bob Reinalda,1975 Lektuurgids ,1979 *Bibliotheek en samenleving* ,1973
