INTERPRETATION

Interpretation, Limitations and Future Direction

The topic frequency graph provides an overview of the most prevalent themes discussed by UK university students on Reddit over time. Notably, while the chart shows an increasing trend for all topics as the subreddit grows, it particularly highlights Topic 4 (Mental Health), becoming the most prominent over time. This shift in focus aligns with broader societal concerns regarding mental health, especially in the wake of the COVID-19 pandemic. Additionally, the chart shows a consistent presence of academic pressure (Topic 1) and financial concerns (Topic 3), reflecting the core challenges of university life. The data also suggests a growing awareness of student support services (Topic 12) and university policies (Topic 13), indicating a more engaged student body. The visualization effectively tracks the evolving priorities and emotional landscape of UK university students over a decade.

However, it is important to acknowledge the limitations of this analysis. The data is derived from a single online platform (Reddit) and may not fully represent the entire student population. Furthermore, the analysis is based on self-reported experiences, which can be influenced by social desirability or other factors. Future research could explore these themes through more diverse data sources and methodologies to provide a more comprehensive understanding of the student experience.
