Slipware Shire Library:

Slipware David Barker, 2009-07-21 Slipware has been one of the most popular types of pottery in Britain since its introduction over four centuries ago. By the seventeenth century the decoration of pottery with slip or clay mixed to a creamy consistency had become widespread and the technique was perfected by the potters of England and Wales. Although confined largely to the lower end of the social spectrum their simple but lively decoration together with their relatively low price guaranteed their place amongst the domestic wares of families for almost three centuries. This book is the perfect introduction to the variety of slipware designs in England and Wales explaining the industry by which it is produced and highlighting some of the most important centers of production in the country. **Essex Archaeology and History**, 2002

Liverpool City Libraries Liverpool (England). Public Libraries, Museums, and Art Gallery, 1913 *English Pottery 1620-1840* Robin Hildyard, 2005-08 Based around the matchless collections of British ceramics in the Victoria and Albert Museum which curators began to assemble as early as the 1840s this book charts the story of their development from the simple slipware drinking vessel of the seventeenth century to the sophisticated enamelled and transfer printed tableware of the early 1800s. The narrative takes us through successive changes of taste and manners as British potters assimilated and adapted new and often disparate influences from Europe and the Far East. Ceramics ubiquitous, disposable and quintessentially domestic tended to reflect social changes quicker than other branches of the applied arts for example new fashions in dining and the taking of tea were responsible for major aspects of design and decoration while the rapid rise of the Staffordshire figure enabled it to become a vehicle for satire, religion or the commemoration of wildly popular but ephemeral events such as boxing matches and visits from touring menageries. Keeping carefully chosen pieces illustrated at the forefront of his discussion Robin Hildyard treats the subject variously by material, form, decoration or by broader theme sometimes cutting across traditional boundaries in order to look behind established myths and the often misleading evidence of what has survived. The methods and history of manufacture are fully explored from the workshop of the independent village potter to the industrialized nineteenth century factory struggling with the stormy beginnings of trade unionism. The complex trade in ceramics both at home and abroad and the transition from utilitarian household object to cherished item in collector's cabinet is also examined along with the symbiotic relationship between collector and museum. This volume filling the gap in current ceramic literature between narrower scholarly studies and the opulent catalogues of private collections presents an expert and yet highly accessible view of a particularly rich seam of British material culture guiding us from familiar ground into wider and sometimes uncharted territory. **BOOK JACKET Artbibliographies Modern**, 1993

Abstracts of journal articles, books, essays, exhibition catalogs, dissertations and exhibition reviews. The scope of **ARTbibliographies Modern** extends from artists and movements beginning with Impressionism in the late 19th century up to the most recent works and trends in the late 20th century. Photography is covered from its invention in 1839 to the present. A

particular emphasis is placed upon adding new and lesser known artists and on the coverage of foreign language literature
