Multipurpose Raingardens

Cutting in Permanent Rain Gardens

In order to make wet sites more usable with permaculture design we will often make the low spots lower by grading them out and use that soil to make the surrounding area higher and dryer.

Elderberry - Aronia - Mulberry

All will grow well in our poorly drained soils and are considered super foods.

Double-Deer Fence

Swales on Contour Planted With Linear Food Forests

Deep Rooted Prairie Plants

Deeper roots allow for better soil drainage and for the increase of soil organic matter.

Native Prairie Habitat

Integrating patches of native prairie on the land will offer multiple advantages. They provide a healing impulse to the land by supporting rainwater percolation into the subsoil, create habitat for an endless number of insect, small mammal and bird species, and build long-term soil fertility.

Apothecary Mandala Garden

An inspiring way to educate ourselves and others about the health benefits of many kinds of different herbs is to grow them in a compelling or dramatic way. With beauty and interest comes curiosity, awareness, and often times, change toward a healthier life.
