Participatory Plant Breeding: Concept and Applications Atul Bhargava,Shilpi Srivastava,2019-04-13 Plant breeding has played a significant role in the development of human civilizations Conventional plant breeding has significantly improved crop yield by genetically manipulating agronomically important traits However it has often been criticized for ignoring indigenous germplasm failing to address the needs of the marginal and the poor farmers and emphasizing selection for broad instead of local adaptation Participatory plant breeding PPB is the process by which the producers and other stakeholders are actively involved in a plant breeding programme with opportunities to make decisions throughout The Working Group on Participatory Plant Breeding PPBwg was established in 1996 under the framework of the Consultative Group on International Agricultural Research CGIAR Research in PPB can promote informed participation and trust in research among consumers and producers and in recent years PPB has had a significant impact on food production by quickly and cost effectively producing improved crop varieties At the same time there has been significant research in the area PPB offers significant advantages that are particularly relevant to developing countries where large investments in plant breeding have not led to increased production especially in the marginal environments In addition to the

economic benefits participatory research has a number of psychological moral and ethical benefits which are the consequence of a progressive empowerment of the farming communities PPB can empower groups such as women or less well off farmers that are traditionally left out of the development process This book explores the potential of PPB in the coming decades The topic is more relevant since international breeding efforts for major crops are aimed at decentralizing local breeding methods to better incorporate the perspective of end users into the varietal development process The first book incorporating the upcoming research on this novel breeding approach it reviews the important tools and applications of PPB in an easy to read succinct format with illustrations to clarify these complex topics It provides readers with a basic idea of participatory plant breeding as well as advances in the field and insights into the future to facilitate the successful integration of farmers into breeding programmes This book is a valuable reference resource for agriculturists agricultural advisers policy makers NGOs post doctoral students and scientists in agriculture horticulture forestry and botany

Farming Is Not Big Gardening Thomas C. Mueller, 2019-05-14 This book is a light hearted yet informative narrative that discusses agriculture in the United States from a historical social and financial perspective It uses a storytelling technique to share the author's widely varied experiences on food and farming as he sees it Written in a somewhat satirical voice the book contains a wealth of information presented in fast moving easy to read prose
