modernism shared industrial modernity's objective of efficiently managing neuromuscular energy. In a series of finely grained and interconnected case studies Veder demonstrates that diverse modernists associated with the Armory Show, the Société Anonyme, the Stieglitz circle especially O'Keeffe and the Barnes Foundation participated in these discourses and practices and that kinesthetic modernism greatly influenced the formation of modern art in America and beyond. This daring and completely original work will appeal to a broad audience of art historians, historians of the body and American culture in general.
