By using Spring you will be lead to use industry best practices to design and implement your applications. The releases of Spring 2.x added many improvements and new features to the 1.x versions. *Spring Recipes A Problem Solution Approach* focuses on Spring 2.5 features for building enterprise Java applications. Spring Recipes covers Spring 2.5 from basic to advanced including Spring IoC container, Spring AOP and AspectJ, Spring data access support, Spring transaction management, Spring Web and Portlet MVC, Spring testing support, Spring support for remoting, EJB, JMS, JMX, E-mail scheduling and scripting languages. This book also introduces several common Spring Portfolio projects that will bring significant value to your application development including Spring Security, Spring Web Flow and Spring Web Services. The topics in this book are introduced by complete and real world code examples that you can follow step by step. Instead of abstract descriptions on complex concepts you will find live examples in this book. When you start a new project you can consider copying the code and configuration files from this book and then modifying them for your needs. This can save you a great deal of work over creating a project from scratch.

Spring Enterprise Recipes Gary Mak, Josh Long, 2010-08-08 The Spring framework is a widely adopted enterprise and general Java framework. The release of Spring Framework 3.0 has added many improvements and new features for Spring development. Written by Gary Mak, author of the bestseller *Spring Recipes* and Josh Long, an expert Spring user and developer, *Spring Enterprise Recipes* is one of the first books on Spring 3.0. This key book focuses on Spring Framework 3.0, the latest version available, and a framework related suite of tools, extensions, plug-ins, modules and more, all of which you may want and need for building three-tier Java EE applications. Build Spring enterprise and Java EE applications from the ground up using recipes from this book as templates to get you started fast. Employ Spring Integration, Spring Batch and jBPM with Spring to bring your application's architecture to the next level. Use Spring's remoting and messaging support to distribute your application or bring your application to the cloud with GridGain and Terracotta.
