Tales of Space and Time H. G. Wells, 2015-10-12 Tales of Space and Time is a fantasy and science fiction collection of three short stories and two novellas written by the English author H G Wells between 1897 and 1898 It was first published by Doubleday McClure Co in 1899 All the stories had first been published in various monthly periodicals and this was the first volume to collect these stories THE CRYSTAL EGG There was until a year ago a little and very grimy looking shop near Seven Dials over which in weather worn yellow lettering the name of C Cave Naturalist and Dealer in Antiquities was inscribed The contents of its window were curiously variegated They comprised some elephant tusks and an imperfect set of chessmen beads and weapons a box of eyes two skulls of tigers and one human several moth eaten stuffed monkeys one holding a lamp an old fashioned cabinet a flyblown ostrich egg or so some fishing tackle and an extraordinarily dirty empty glass fish tank There was also at the moment the story begins a mass of crystal worked into the shape of an egg and brilliantly polished And at that two people who stood outside the window were looking one of them a tall thin clergyman the other a black bearded young

man of dusky complexion and unobtrusive costume The dusky young man spoke with eager gesticulation and seemed anxious for his companion to purchase the article Victorian Visions of Suburban Utopia Nathaniel Robert Walker,2020 A study of British and American Utopian writing of the 1800s in the context of developments in real architectural political and cultural life The book studies utopian visions published in the UK and the USA in the 1800s by writers such Robert Owen James Silk Buckingham Edward Bellamy and William Morris Tales of Space and Time H. Stravinsky, God, and Time Helen Sills,2022-08-01 If as Robert Craft remarked religious beliefs were at the core of Stravinsky s life and work why have they not figured more prominently in discussions of his works Stravinsky s coordination of the listener with time is central to the unity of his compositional style This ground breaking study looks at his background in Russian Orthodoxy at less well known writings of Arthur Louri and Pierre Souvtchinsky and at the Catholic philosophy of Jacques Maritain that shed light on the crucial link between Stravinsky s spirituality and his restoration of time in music Recent neuroscience research supports Stravinsky s eventual adoption of serialism as the natural and logical outcome of his spiritual and musical quest **The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition**

Linda Dalrymple Henderson,2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak *Modernism's History* Bernard Smith,1998-01-01 The history of twentieth century visual arts can no longer be written as a succession of avant garde movements contends eminent

art historian Bernard Smith in this stimulating book He argues that a return to the concept of period style is inevitable and that modernism the dominant style of art that emerged at the end of the nineteenth century and continued through the 1960s deserves recognition as a period style Smith renames this period Formalesque since it is no longer modern and since it emphasizes the formal values of art more than any previous period does In a wide ranging reformulation of art history in the twentieth century the author defines the nature and development of Formalesque an avant garde style that arose between 1890 and the First World War was institutionalized between the world wars and flourished anew between 1945 and 1960 Identifying the Formalesque period says Smith makes it possible also to identify dialectical adversaries such true oppositional avant garde styles of the twentieth century as Dada Surrealism and the Neue Sachlichkeit These constitute the formative elements of the modernism now called postmodernism that became increasingly dominant after 1960 The author locates twentieth century artistic movements and developments in a broad cultural context and concludes with a thought provoking examination of the relation between the Formalesque and European and American cultural imperialism

British Science Fiction Film and Television Tobias Hochscherf, James Leggott, Donald E. Palumbo, 2014-01-10 Written by international experts from a range of disciplines these essays examine the uniquely British contribution to science fiction film and television Viewing British SF as a cultural phenomenon that challenges straightforward definitions of genre nationhood authorship and media the editors provide a conceptual introduction placing the essays within their critical context Essay topics include Hammer science fiction films the various incarnations of Doctor Who Stanley Kubrick s A Clockwork Orange and such 21st century productions as 28 Days Later and Torchwood

The Spectator , 1899 A Broader View of Relativity Jong-Ping Hsu, Leon Hsu, 2006 A Broader View of Relativity shows that there is still new life in old physics The book examines the historical context and theoretical underpinnings of Einstein s theory of special relativity and describes Broad Relativity a generalized theory of coordinate transformations between inertial reference frames that includes Einstein s special relativity as a special case It shows how the principle of relativity is compatible with multiple concepts of physical time and how these different procedures for clock synchronization can be useful for thinking about different physical

problems including many body systems and the development of a Lorentz invariant thermodynamics Broad relativity also provides new answers to old questions such as the necessity of postulating the constancy of the speed of light and the viability of Reichenbach's general concept of time The book also draws on the idea of limiting four dimensional symmetry to describe coordinate transformations and the physics of particles and fields in non inertial frames particularly those with constant linear accelerations This new edition expands the discussion on the role that human conventions and unit systems have played in the historical development of relativity theories and includes new results on the implications of broad relativity for clarifying the status of constants that are truly fundamental and inherent properties of our universe
