Cli Fi Novel Blueprint:

The Blueprint of History of English Literature (As Per NEP-2020 Model Syllabus) Dr. Samir Kumar Hui, 2025-04-21

The Noah Myth in Twenty-first-century Cli-fi Novels Helen E. Mundler, 2022 Breaks new ground by both analyzing the literary qualities of four recent rewritings of the Noah myth and contextualizing their concern with climate change within the wider crises of the Anthropocene. With the rise of concern about global warming in recent years, climate change fiction or cli fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research. Flood narratives have become a subsection of cli fi in their own right. This book proposes new readings of four recent rewritings of the Noah myth: *Odds Against Tomorrow* by Nathaniel Rich, Margaret Atwood's *Maddaddam* trilogy, *When the Floods Came* by Clare Morrall, and *The Flood* by Maggie Gee. Helen E. Mundler's book takes into account the wealth of criticism that has appeared on these texts in recent years, acknowledging important contributions from critics including Adam Trexler, Adeline Johns-Putra, and Astrid Bracke. However, her book's strength is that it takes a new approach, going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. While the importance of climate change is beyond debate, this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene. y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. (Eco)Anxiety in Nuclear Holocaust Fiction and Climate Fiction Dominika Oramus, 2023-07-07 *Eco Anxiety in Nuclear Holocaust Fiction and Climate Fiction: Domsday Clock Narratives* demonstrates that disaster fiction, nuclear holocaust, and climate change alike allow us to unearth and anatomise contemporary psychodynamics and enable us to identify pretraumatic stress as the common denominator of seemingly unrelated types of texts. These Domsday Clock Narratives argue that earth's demise is soon and certain. They are set after some catastrophe and depict people waiting for an even worse catastrophe to come. References to geology are particularly important in descriptions of the landscape; the emphasis falls on waste and industrial bric-a-brac which is seen through the eyes of a future posthuman archaeologist. Their protagonists have the uncanny feeling that the countdown has already started and they are coping with both traumatic memories and pretraumatic stress. Readings of novels by Walter M. Miller, Nevil Shute, John Christopher, J.G. Ballard, George Turner, Maggie Gee, Paolo Bacigalupi, Ruth Ozeki, and Yoko Tawada.

demonstrate that the authors are both indebted to a century old tradition and inventively looking for new ways of expressing the pretraumatic stress syndrome common in contemporary society This book is written for an academic audience postgraduates researchers and academics specialising in British Literature American Literature and Science Fiction Studies

African Climate Futures Carl Death, 2025-06-10 *African Climate Futures* shows how climate changed futures are imagined in Africa and by Africans and how these future visions shape political debates and struggles in the present Scientific climate scenarios forecast bleak futures with increased droughts floods lethal heatwaves sea level rises declining crop yields and greater exposure to vector borne diseases Yet African climate futures could also encompass energy transitions and socio economic revolutions transformed political agency and human subjectivities and radically reparative more than human climate politics At the heart of the book is an original and interdisciplinary approach It studies official climate policy strategies and fictional texts side by side as ecopolitical imaginaries that envision low carbon climate changed futures and narrate pathways from here to there It discusses net zero strategies from Ethiopia The Gambia Nigeria South Africa and Zimbabwe and draws on postcolonial feminist and queer

theory arguing that Africanfuturist climate fiction can inspire more radical reparative more than human ecopolitical imaginaries These stories can help us to understand the debts we all owe imagine what reparations might entail and explore the contours of living convivially alongside more than human others in heterotopian climate changed futures Stories can help explore how we might feel in climate changed futures and can help us to narrate a path through them This book uses Africanfuturist climate fiction to inspire new ways of challenging and enriching theoretical debates in global climate change politics including how we understand the places temporalities ecologies and politics of climate futures If we want to survive to tell new stories in liveable futures then we need to urgently and radically transform carboniferous capitalism Oxford
