Balance Dirk Dunbar,2017-03-31 In *Renewing the Balance* Dirk Dunbar shows how the balance worshipped in ancient Earth wisdom traditions is being integrated into Western culture s dominantly masculine rational value system Filled with hope revelations regarding cultural evolution and scholarship of the highest order Dunbar s book passionately challenges all of us to recover the archaic reverence for the natural world to reconsider the limits of growth progress and mechanistic thinking and to join in the newly reclaimed celebration of life that fosters peace and the potential for a sustainable future Dirk Dunbar s *Renewing the Balance* is a crucial and comprehensive account of how traditional cultures maintained a healthy balance that preserved our natural world and how our modern technocratic economic ideology has produced a culture that is dangerously out of balance It is at once a diagnosis of our dis ease and a prescription for healing our collective psyche polis and environment A truly fascinating philosophical adventure Sam Keen Author of 12 books including *The Passionate Life* and *Hymns to an Unknown God* *Renewing the Balance* brings depth and breadth to our efforts to understand how Western culture evolved as it did and to appreciate the many streams that now flow into our efforts to manifest ecological wisdom in a hypermodern world Charlene Spretnak Author of 9 books including *States of Grace* and *The Resurgence of the Real*

Morgan,2012-10-18 A prophetic challenge to the Western church The Christian faith is always subversive to the dominant world view Jesus overturned every assumption which stopped people experiencing the living reality of God the heart of truth Sadly the Western world has reduced truth to the merely rational and then discarded it as inadequate In Africa and other parts of the world where God s truth has never been straitjacketed in this way the church is characterised by a joy now absent in the West Western culture has limited what we can believe and receive Can we Burst free from this restrictive secular framework Learn not only to know truth but to feel it and live it Live our faith in such a way that it becomes real to those around us Alison Morgan shows that Jesus lived free from the culturally imposed norms which restrict our understanding of truth Examining church history prophecy past and present the state of our culture and of the church today and drawing on personal experience and the experience of others Alison blends analysis and imagination history and poetry in this prophetic challenge to Western Christians *Christianity and Ecological Theology* E. M. Conradie,2006-10-01 There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa **Environmentalism and Political Theory** Robyn Eckersley,1992-01-01 This book provides the most detailed and comprehensive examination to date of the impact of environmentalism upon contemporary political thought It sets out to disentangle the various strands of Green political thought and explain their relationship to the major Western political traditions Environmentalism and Political Theory represents the consolidation of a new field of political inquiry that is destined to become an increasingly important component of political studies and political reporting worldwide An interdisciplinary study that builds bridges between environmental philosophy ecological thought and political inquiry this book employs a range of new insights from environmental philosophy to outline a particular Green political perspective The Sense of Being Stared At Rupert Sheldrake,2013-06-22 Explores Rupert Sheldrake s more than 25 years of research into telepathy staring and intention precognition and animal premonitions Shows that unexplained human abilities such as the sense of being stared at and phone telepathy are not paranormal but normal part of our biological nature Draws on more than 5 000 case histories 4 000 questionnaire responses and the results of experiments carried out with more than 20 000 people Reveals that our minds and intentions extend beyond our brains into the world around us and even into the future Nearly everyone has experienced the feeling of being watched or had their stare result in a glance in their direction The phenomenon has been cited throughout history in nearly every culture along with other commonplace paranormal occurrences such as premonitions and telepathy In this newly updated edition Sheldrake shares his more than 25 years of research into telepathy the power of staring remote viewing precognition and animal premonitions Drawing on more than 5 000 case histories 4 000 questionnaire responses and

the results of experiments on staring thought transference phone telepathy and other phenomena carried out with more than 20 000 people as well as reports and data from dozens of independent research teams Sheldrake shows that these unexplained human abilities such as the sense of being stared at are not paranormal but normal part of our biological nature He reveals that telepathy depends on social bonds and traces its evolution from the connections between members of animal groups such as flocks schools and packs Sheldrake shows that our minds and intentions extend beyond our brains into our surroundings with invisible connections that link us to each other to the world around us and even to the future **The**

Green Breast of the New World Louise H. Westling, 1996 In searching American literary landscapes for what they can reveal about our attitudes toward nature and gender *The Green Breast of the New World* considers symbolic landscapes in twentieth century American fiction the characters who inhabit those landscapes and the gendered traditions that can influence the figuration of both of these fictional elements In this century says Louise H Westling American literary responses to landscape and nature have been characterized by a puzzling mix of eroticism and misogyny celebration and mourning and reverence and disregard Focusing on problems of gender conflict and imperialist nostalgia *The Green Breast of the New World* addresses this ambivalence Westling begins with a deep history of literary landscapes looking back to the archaic Mediterranean Mesopotamian traditions that frame European and American symbolic figurations of humans in the land Drawing on sources as ancient as the Sumerian Hymns to Innana and the Epic of Gilgamesh she reveals a tradition of male heroic identity grounded in an antagonistic attitude toward the feminized earth and nature This identity recently has been used to mask a violent destruction of wilderness and indigenous peoples in the fictions of progress that have shaped our culture Examining the midwestern landscapes of Willa Cather's *Jim Burden* and Ernest Hemingway's *Nick Adams* and the Mississippi Delta of William Faulkner's *Thomas Sutpen* and Isaac McCaslin and Eudora Welty's plantation families and small town dwellers Westling shows that these characters all participate in a cultural habit of gendering the landscape as female and then excusing their mistreatment of it by retreating into a nostalgia that erases their real motives displaces responsibility and takes refuge in attitudes of self pitying adoration **Design Research** Peter Downton, 2003 Design research
