Annals of Cleveland United States. Work Projects Administration (Ohio),1937 **Syntactic Analysis and Description**
David Lockwood,2005-12-07 This book is designed to teach undergraduate and beginning graduate students how to understand analyse and describe syntactic phenomena in different languages The book covers every aspect of syntax from the basics to more specialised topics such as clitics which have grammatical importance but cannot be used in isolation and negation in which a construction contradicts the meaning of a sentence The approach taken combines concepts from different theoretical schools which view syntax differently These include M A K Halliday s systemic functional linguistics the stratificational school advocated by Sydney Lamb and Kenneth L Pike s tagmemic model The emphasis of the book is on syntactic structures rather than linguistic meaning and the book stresses the difference between a well formed sentence and a meaningful one The final chapter brings these two aspects together to show the connections between syntax and semology Each chapter concludes with exercises from a diverse range of languages and a list of major technical terms The book also includes a glossary as an essential resource for students approaching this difficult subject for the first time **Hearings**

The Normative Status of Time Bias Kristie Miller,2024-12-10 This book empirically investigates the nature of time biases Many philosophers think that it is rationally permissible to prefer a life that is overall worse to one that is overall better as long as the badness of that life lies in the past rather than the future These philosophers think that it is rationally permissible to be time biased Time biased individuals differently value the wellbeing of their various selves in virtue of where those selves are located in time This book focuses on three key kinds of time bias near present and future bias It presents a rich picture of the conditions under which we display these biases and it outlines several psychological explanations for them It then uses this new empirical research we conducted to inform arguments regarding the normative status of these biases At its heart it considers the question does having time biased preferences of one sort or another make us better off or worse off And it uses the answers to these questions to inform our theorising about whether we have reason either to have or to avoid having such preferences **The War of the Rebellion: v. 1-53 [serial no. 1-111] Formal reports, both Union and Confederate, of the first seizures of United States property in the southern states, and of all military operations in the field, with the correspondence, order and returns relating specially thereto. 1880-1898. 111 v** United States.
