Media Sensation Viral Romance Tiktok:

Decolonising Digital Media and Indigenisation of Participatory Epistemologies Fulufhelo Oscar

Makananise, Shumani Eric Madima, 2024-08-13 The book provides valuable insights on decolonising the digital media landscape and the indigenisation of participatory epistemologies to continue the legacies of indigenous languages in the global South. It is one of its kind as it climaxes that the construction phase of self-determining and redefining among the global South societies is an essential step towards decolonising the digital landscape and ensuring that indigenous voices and worldviews are equally infused, represented and privileged in the process of higher-level communication, exchanging epistemic philosophies and knowledge expressions. The book employs an interdisciplinary approach to engage in the use of digital media as a sphere for resistance and knowledge transformation against the persistent colonialism of power through dominant non-indigenous languages and scientific epistemic systems. It further advocates that decolonising digital media spaces through appreciating participatory epistemologies and their languages can help promote the inclusion and empowerment of indigenous communities. It indicates that the decolonial process can also help to redress the historical and ongoing injustices that have disadvantaged many indigenous communities in the global South and contributed to their marginalisation. This book will appeal to undergraduate and graduate students, scholars and academics in communication, media studies, languages, linguistics, cultural studies and indigenous knowledge systems in higher education institutions. It will be a valuable resource for those interested in epistemologies of the South, decoloniality, postcoloniality, indigenisation, participatory knowledge, indigenous language legacies, indigenous artificial intelligence and digital media in the Fourth Industrial Revolution. *Theological Discourses on Social Media* Christopher B. Barnett, Clark J. Elliston, Trevor B.

Williams, 2025-08-29 *Theological Discourses on Social Media* will examine ten different social media platforms across three overarching parts. The task throughout is first to delineate the configuration and intent of a given form of social media and second to probe its implications for theology. On the whole, the volume will focus on the Judeo-Christian tradition, though dialogue with and insight from other religious traditions will also be featured. The upshot will be a unique theological engagement with the defining issue of our era, a work that will be as relevant as it will be engrossing. Featuring contributions from leading scholars, it will be a must-read for all students of theology, religion and media and cultural studies. **Mobile**

Rise of Viral Videos Glen Perslow, 2025-03-21 What makes a video explode across the internet, captivating millions and shaping online culture? Rise of Viral Videos explores this phenomenon, dissecting the mechanisms behind online video virality and its profound impact on society. This book delves into the core elements that contribute to a video's rapid spread, examining how these videos influence trends, memes, and the very fabric of internet culture. This book focuses on three key areas: the anatomy of a viral video, the social dynamics that fuel its propagation, and the broader cultural consequences of this digital wildfire. Understanding these elements is crucial for anyone seeking to navigate the increasingly complex landscape of online media, from marketers and content creators to social scientists and engaged citizens. The book provides a contextual framework tracing the evolution of online video from its early days to the present era of ubiquitous streaming and social sharing. It examines the technological advancements that have enabled widespread video creation and consumption, as well as the social platforms that serve as the primary channels for viral dissemination. No prior technical expertise is required; the book explains complex concepts in an accessible manner. The central argument of Rise of Viral Videos is that viral videos are not simply random occurrences but are the result of a confluence of factors, including emotional resonance, social influence, and strategic dissemination. Understanding these factors allows for a more informed perspective on how information spreads online and how we can better understand and potentially influence these dynamics. The book is structured to provide a comprehensive exploration of the topic. It begins by defining what constitutes a viral video and introduces key concepts such as memes, social influencers, and algorithms. It then develops the argument through three major sections: 1. Content Characteristics: Examining the elements within the videos themselves that contribute to virality, such as humor, surprise, relatability, and emotional impact. 2. Social Amplification: Analyzing the role of social media platforms, online communities, and influencers in spreading videos. This section looks at network effects, algorithmic amplification, and the psychology of sharing. 3. Cultural Impact: Exploring the broader consequences of viral videos on society, including their influence on trends, politics, and social movements. The arguments presented in this book are supported by a combination of quantitative data analysis
