Visionary Liberia Leader Dr Amos Mohammed D Sirleaf, Amos Mohammed D. Sirleaf, 2009 Although many readers will find *Going All the Way Round* a guide to the care of their own aging parents it is primarily the story of the author's ambivalence about her care of her parents as they aged She hadn't expected to be a nurse She found all kinds of surprises in dealing with her mother and father and the demands of care giving For example there were her attempts to hire aides for her dad who wouldn't steal the silverware or bring their horses or husbands to work with them and her mother's forgotten savings accounts Dealing with their many problems made the author a strong and determined person Despite the pain involved she would not have changed anything Challenge of Third World Development (Custom Strayer University) Strayer, 2011 Resources in Education, 1998 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1971 *Scientific and Technical Aerospace Reports*, 1995 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **Managing the Big Picture in Colleges and Universities** Richard L. Alfred, 2006 This book is intended to serve as a road map for strategy creation and execution for leaders and decision makers who by choice or by necessity are looking to use strategy to optimize the development of their institutions It is the first book of its kind to focus exclusively on strategy as it applies to postsecondary education As the authors explain strategy is a systematic way of positioning an institution within a context of community stakeholders In today's competitive environment higher education leaders must become adept at differentiating their institutions from competitors to obtain the resources necessary for growth and sustainable advantage The book begins by explaining the concept of strategy and its application The authors describe the evolution of modern strategy and how it has been applied and developed by strategy theorists and practitioners The book also explores how strategy is shaped by critical factors related to the mission control and culture of the institution For example strategy that is appropriate in a liberal arts college may be completely inappropriate for community college or a teaching university Real world cases are employed to illustrate the applications of strategy in three different settings a private liberal arts college a comprehensive public institution and a special purpose institution The last section moves to the hands on world of strategy formulation and implementation inside the institution The authors end with an outline of key concepts for building a plan for implementing strategy and provide a framework for evaluating its impact

Ideas and Foreign Policy Judith Goldstein, Robert O. Keohane, 2019-06-30 Do people's beliefs help to explain foreign policy decisions or is political activity better understood as the self interested behavior of key actors The collaborative effort of a group of distinguished scholars this volume breaks new ground in demonstrating how ideas can shape policy even when actors are motivated by rational self interest After an introduction outlining a new framework for approaching the role of ideas in foreign policy making well crafted case studies test the approach The function of ideas as road maps that reduce

uncertainty is examined in chapters on human rights decolonialization the creation of socialist economies in China and Eastern Europe and the postwar Anglo American economic settlement Discussions of parliamentary ideas in seventeenth century England and of the Single European Act illustrate the role of ideas in resolving problems of coordination The process by which ideas are institutionalized is further explored in chapters on the Peace of Westphalia and on German and Japanese efforts to cope with contemporary terrorism

An Introduction to Historical Comparison Mikhail Krom, 2021-01-14
Historical comparison as a method of historical analysis goes back to Herodotus in antiquity yet it was not until the 1920s through the work of historian Marc Bloch that it was recognised as a solid historical method Even today some historians are wary of applying a comparative lens to their work Why is this Mikhail Krom asks when historical comparison can be an incredibly insightful approach to history Designed as a helpful resource for historians An Introduction to Historical Comparison aims to teach scholars how to develop the skills needed to successfully employ a comparative methodology It begins by tracing the intellectual history of comparative history writing and then examines the practice of historical comparison The result is a clear and engaging analysis of historical thinking and a useful guide to main methodological techniques successes and pitfalls of comparative research An Introduction to Historical Comparison is the first comprehensive study of the theory and practice of comparative historical research Combining a wide range of case studies from the best practitioners of historical comparison with an innovative interdisciplinary perspective this book is thus a meaningful contribution to current debates on historiography As such this resource will be of immense value to both students reading historiography and methodology and to historians looking to apply a comparative approach to their own research
