The Last Wilderness Preserve

by Gordon Lindbergh

1. Though there is no doubt that the forests were magnificent, approximately square blocks that gleamed black in the white light of day, great sections made shaggy walls, those wind-blown, blackened, weathered trunks that were as much a part of the scene as the greenest of the forest as a whole. As a result, some of the fine places are beautiful because they are significantly changed by people, and the preservation that would have been necessary to keep them as they were would be a different sort of preservation.

2. In 1978, leaders from twelve nations signed the Antarctic Treaty, which forbids military activity, mining, or nuclear tests. While this prohibition helps to ensure that Antarctica is for all people, it also leaves a great deal of uncertainty about the future of the continent. The question is whether, in addition to the scientific research that has been carried on there, people should be allowed to exploit the continent's natural resources.

3. Scientists have shown that Antarctica is rich in coal, oil, and natural gas. There are also some mineral deposits. Some people want to exploit these resources. Others believe that Antarctica is a natural laboratory for the study of the environment. The question is whether the continent should be used for one or the other purpose.

4. The Antarctic Treaty states that the continent is to be used for peaceful purposes only. It also states that the continent is to be used for scientific research only. The question is whether the continent should be used for one or the other purpose.
