Askins, Robert Askins, 2014-03-25 Deciduous forests have been remarkably resilient throughout their history recovering from major shifts in climate and surviving periods of massive deforestation But today the world's great forests confront more ominous threats than ever before This visionary book is the first to examine forests consisting of oaks maples hickories beeches chestnuts birches and ecologically similar animals and plants on three continents East Asia Europe and North America to reveal their common origin back in time the ecological patterns they share and the approaches to conservation that have been attempted on their behalf Although these forests face common problems threats due to human activities vary Different land use and agricultural practices on the three continents as well as different attitudes about what is worth preserving have led to strikingly different approaches to forest conservation Robert Askins explores the strengths and weaknesses of conservation efforts across the continents and concludes that the ideal strategy for the future will blend the best ideas from each

Ringling & Migration, 1989 **Interspecific Competition in Birds** André A. Dhondt, 2012 Provides a current critical review of the importance of interspecific competition considering the evolutionary effects of interspecific competition its importance in structuring communities and influence on the traits of individual species **Ardea**, 1989 **Current Ornithology** D.M. Power, 2013-06-29 In this volume I include chapters on continental population trends ornithology's contribution to the habitat concept social organization outside the breeding season the role of predation in limiting numbers and the evolution of prolonged incubation periods Authors are based in Belgium the United Kingdom and the United States Is there evidence for wholesale population declines in North American birds Robert Askins says yes with qualifications Fragmentation of forest causes the population of many forest interior species to decline and loss of winter forest habitat in Mexico Central America and the Greater Antilles is potentially serious Trends over the past 25 years are however difficult to discern Grassland and shrubland specialists have likewise diminished over the past quarter century Askins calls for management of regional landscapes to maintain habitat diversity As for habitats William Block and Leonard Brennan review the role of ornithology in developing the concept of habitat Their intention is to stimulate ornithologists to consider habitat as

a unifying concept in contemporary ecology They describe uses of the habitat concept in basic and experimental ecology Recent advances in sociobiology stimulated deeper interest in social organization Erik Matthysen has gathered a diversity of information on social organization outside the breeding season both in migratory and in nonbreeding resident birds He discusses populations that continue individual associations outside the breeding season and site related aggression territoriality and reviews a number of long term benefits of these behaviors **Scottish Bird News** ,1996 *Winging it* ,1999 **Birding World** ,1998
