PEDIATRIC MUSIC THERAPY Wanda B. Lathom-Radocy, 2014-06-01 The book includes relevant medical psychological and developmental information to help service providers and parents to understand children with disabilities In this revised edition the author has updated or eliminated some of the medical information and added more related music therapy literature This book can be used as a valuable handbook for clinicians Also it may be used as a primary or supplemental textbook in classes to prepare music therapy students to work with children who have disabilities All music therapy students who complete an undergraduate curriculum should know the characteristics and common needs of the major disabilities discussed in this book In addition class work and clinical experiences must include basic techniques and materials used to accomplish the goals and objectives set for each child This is addressed in a manner that will be useful to all personnel working with children with disabilities The first two chapters describe the process of assessment and delineation of goals in music therapy which leads to the design of the music therapy portion of the IEP or care plan Subsequent evaluation allows progress to be stated objectively The remaining chapters describe each population of children to be served with emphasis on medical and psychological characteristics unique to each population and specific goals and procedures to be used in music therapy The CAMEOS model is used in this book to address the child's Communication Academic Motor Emotional Organizational and Social needs and ways these may be addressed through music therapy Whether the child is homebound included in regular classes seen in a resource room or special education program or in hospital care he/she has needs that can be described within the CAMEOS model Music therapy may provide service in each of these areas

Accessible Technology and the Developing World Michael Ashley Stein, Jonathan Lazar, 2021-10-13 When digital content and technologies are designed in a way that is inaccessible for persons with disabilities they are locked out of commerce education employment and access to government information In developing areas of the world as new technical infrastructures are being built it is especially important to ensure that accessibility is a key design goal Unfortunately nearly all research on Information and Communication Technology ICT accessibility and innovation for persons with disabilities whether from the legal technical or development fields has focused on developed countries with very little being written about developing world initiatives Accessible Technology and the Developing World aims to change this by bringing increased attention to ICT accessibility in developing areas This book brings together a unique combination of contributors with diverse disciplinary backgrounds including authors from well known non governmental organizations

significant United Nations entities and universities in both the developing and developed world Together they present a unique and much needed review of this critical and growing area of work and primarily address three core themes the lack of attention given to innovations taking place in the developing world the need to ensure that infrastructures in the Global South do not present barriers to people with disabilities and the need to exercise caution when applying techniques from the Global North to the Global South that won t transfer effectively This book will be of use to researchers in the fields of civil rights development studies disability rights disability studies human computer interaction and accessibility human rights international law political science and universal design
