Skyfaring A Journey With A Pilot:

Skyfaring Mark Vanhoenacker, 2015 The twenty first century has relegated airplane flight a once remarkable feat of human ingenuity to the realm of the mundane When most people today think of flying they imagine tedious routines that involve security checkpoints exorbitant baggage fees shrinking legroom and frustrating delays Mark Vanhoenacker a 747 pilot who gave up careers in academia and the business world to pursue his childhood dream of flight asks us to re imagine what we both as pilots and as passengers are actually doing when we enter the world between departure and discovery In a seamless fusion of history politics geography meteorology ecology family and physics the author vaults across geographical and cultural boundaries above mountains oceans and deserts through snow wind and rain limning a simultaneously humbling and almost superhuman activity which can afford us unparalleled perspectives on the planet we inhabit and the communities we form

Skyfaring Mark Vanhoenacker, 2016-07-07 Flight like any great love is both a liberation and a return an airline pilot captures the wonder of flight for the modern traveller Sunday Times Bestseller Book of the Week on Radio 4 Think back to when you first flew When you first left the Earth and travelled high and fast above its turning arc When you looked down on a new world captured simply and perfectly through a window fringed with ice When you descended towards a city and arrived from the sky as effortlessly as daybreak In *Skyfaring* airline pilot and flight romantic Mark Vanhoenacker shares his irrepressible love of flying on a journey from day to night from new ways of mapmaking and the poetry of physics to the names of winds and the nature of clouds Here anew is the simple wonder that remains at the heart of an experience which modern travellers armchair and otherwise all too easily take for granted the transcendent joy of motion and the remarkable new perspectives that height and distance bestow on everything we love

An Airline Pilot's Final Flight to Sobriety A.J. Muench, 2024-06-24 *An Airline Pilot's Final Flight to Sobriety* is a narrative memoir and takes place on a metaphorical flight with the landing at the Final Destination the author's two year sobriety date The chapters Take off Climb Cruise Descent Approach and Landing correspond to his life's journey with alcohol amidst flying in the US Navy US Customs and a major US airline for four decades His flight plan uncovers the many reasons why we drink why we lose altitude in our lives and how to jettison alcohol to gain altitude and soar in the Jet Stream Come along on the flight the Jetway doors are closing in five minutes

Systems Ultra Georgina Voss, 2024-01-30 *A TOOLBOX FOR COMPREHENDING AND CHANGING THE WORLD* *Systems Ultra* explores how we experience complex systems the mesh of things people and ideas interacting to produce their own patterns and behaviours What does it mean when a car which runs on code drives dangerously What does massmarket graphics software tell us about the workplace politics of architects And in these human made systems which phenomena are designed and which are emergent In a world of networked technologies global supply chains and supranational regulations there are growing calls for a new kind of literacy around systems and their ramifications At the same time we are often told these systems are impossible to fully comprehend and are far beyond our control Drawing on field research and artistic

practice around the industrial settings of ports air traffic control architectural software payment platforms in adult entertainment and car crash testing Georgina Voss argues that complex systems can be approached as sites of revelation around scale time materiality deviance and breakages With humour and guile she tells the story of what systems have come to mean how they have been sold to us and the real world consequences of the power that flows through them Systems Ultra goes beyond narratives of technological exceptionalism to explore how we experience the complex systems which influence our lives how to understand them more clearly and perhaps how to change them
