Space And Place The Perspective Of Experience:

Space and Place Yi-Fu Tuan, 1977 **Space and Place**, 2001 Real and Imaginary Spaces in Tom Stoppard's Plays Nevin Gürbüz-Blaich, 2025-06-02 This study benefits from the terminology of geocriticism a literary criticism that suggests an interdisciplinary approach to the exploration of literature in relation to space and place and refers to the spatial theories of Lefebvre Foucault Bakhtin Aug and Certeau as well as to Issacharoff's study of dramatic space Proposing a multidisciplinary perspective the book analyzes the mimetic and diegetic spaces in four of Tom Stoppard's plays *Rosencrantz and Guildenstern Are Dead* 1966 *Travesties* 1974 *Arcadia* 1993 and *Indian Ink* 1995 Stoppard's plays from the 1960s to the 2000s portray different spaces including urban spaces cities landscapes rooms and fictional sites thus serving as exceptional textual sources in spatial literary studies **Higher Education: Handbook of Theory and Research** John C. Smart, 2009-04-24 Published annually since 1985 the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities Each chapter provides a comprehensive review of research findings on a selected topic critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic The Handbook focuses on twelve general areas that encompass the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world *Solarizing the Moon: Essays in honour of Lionel Sims* Fabio Silva, Liz Henty, 2022-07-21 Lionel Sims has produced an influential body of work that has challenged existing narratives about British prehistoric monuments and provided innovative ways to approach and think about skylscapes This book in his honour is divided into three parts Anthropology and Human Origins Prehistory and Megalithic Monuments and Theory The Wiley-Blackwell Companion to Human Geography John A. Agnew, James S. Duncan, 2011-03-01 This volume provides an up to date authoritative synthesis of the discipline of human geography Unparalleled in scope the companion offers an indispensable overview to the field representing both historical and contemporary perspectives Edited and written by the world's leading authorities in the discipline Divided into three major sections Foundations the history of human geography from Ancient Greece to the late nineteenth century The Classics the roots of modern human geography Contemporary Approaches current issues and themes in human geography Each contemporary issue is examined by two contributors offering distinctive perspectives on the same theme Place and the Moving Image Elisabeth Brun, 2025-11-06 *Place and the Moving Image* offers a rethinking of how experimental film and especially essay film practices engage with spatial knowledge and environmental awareness At its heart is the concept of Moving Image Topography a critical and artistic model for thinking with the moving image about the relation between technological forms and place structures and how these shape our experience of environments whether natural built and lived Responding to urgent questions in eco media and artistic

research Elisabeth Brun argues that place is not merely a setting or backdrop but a critical generative force in experimental film a vital lens for understanding the eco critical and epistemological potential of moving image arts and their modes of thinking Through a rigorous and interdisciplinary approach that combines theory close readings of essayist and materialist film practices and artistic research in her sub Arctic home village Brun explores how the moving image can render visible the often invisible dynamics between perceptual experience spatial environments and technological mediation Rather than treating theory and practice as separate domains this book shows how both emerge from the same topographical foundation At stake is not only how to understand film but how we understand our own grounding the inseparability of Earth s textures and our forms of experience through which perspective itself can be re gained It will engage scholars artists and practitioners interested in place environmental aesthetics indigenous perspectives and critical film practice across fields such as film and media studies visual art design architecture and philosophy The experimental film *3xShapes of Home* 2020 is central to this study and is included as a Routledge online Support Material to this book

Space, Place and Territory Fabio Duarte, 2017-01-12 Space place and territory are concepts that lie at the core of geography and urban planning environmental studies and sociology Although space place and territory are indeed polysemic and polemic they have particular characteristics that distinguish them from each other They are interdependent but not interchangeable and the differences between them explain how we simultaneously perceive conceive and design multiple spatialities After drawing the conceptual framework of space place and territory the book initially explores how we sense space in the most visceral ways and how the overlay of meanings attached to the sensorial characteristics of space change the way we perceive it smell spatial experiences using electroencephalography and the changing meaning of darkness are discussed The book continues exploring cartographic mapping not as a final outcome but rather as an epistemological tool an instrument of inquiry It follows on how particular ideas of space place and territory are embedded in specific urban proposals from Brasilia to the Berlin Wall airports and infiltration of digital technologies in our daily life The book concludes by focusing on spatial practices that challenge the status quo of how we perceive and understand urban spaces from famous artists to anonymous interventions by traceurs and hackers of urban technologies Combining space place and territory as distinctive but interdependent concepts into an epistemological matrix may help us to understand contemporary phenomena and live them critically
