Blueprint Cli Fi Novel:

The Blueprint of History of English Literature (As Per NEP-2020 Model Syllabus) Dr. Samir Kumar Hui, 2025-04-21 *The Noah Myth in Twenty-first-century Cli-fi Novels* Helen E. Mundler, 2022 Breaks new ground by both analyzing the literary qualities of four recent rewritings of the Noah myth and contextualizing their concern with climate change within the wider crises of the Anthropocene. With the rise of concern about global warming in recent years, climate change fiction or cli-fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research. Flood narratives have become a subsection of cli-fi in their own right. This book proposes new readings of four recent rewritings of the Noah myth: *Odds Against Tomorrow* by Nathaniel Rich, *Margaret Atwood's Maddaddam* trilogy, *When the Floods Came* by Clare Morrall, and *The Flood* by Maggie Gee. Helen E. Mundler's book takes into account the wealth of criticism that has appeared on these texts in recent years, acknowledging important contributions from critics including Adam Trexler, Adeline Johns Putra, and Astrid Bracke. However, her book's strength is that it takes a new approach, going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. While the importance of climate change is beyond debate, this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene. y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. (Eco)Anxiety in Nuclear Holocaust Fiction and Climate Fiction Dominika Oramus, 2023-07-07 *Eco Anxiety in Nuclear Holocaust Fiction and Climate Fiction: Domsday Clock Narratives* demonstrates that disaster fiction, nuclear holocaust, and climate change alike allow us to unearth and anatomise contemporary psychodynamics and enable us to identify pretraumatic stress as the common denominator of seemingly unrelated types of texts. These Domsday Clock Narratives argue that earth's demise is soon and certain. They are set after some catastrophe and depict people waiting for an even worse catastrophe to come. References to geology are particularly important in descriptions of the landscape; the emphasis falls on waste and industrial bric-a-brac which is seen through the eyes of a future posthuman archaeologist. Their protagonists have the uncanny feeling that the countdown has already started and they are coping with both traumatic memories and pretraumatic stress. Readings of novels by Walter M. Miller, Nevil Shute, John Christopher, J.G. Ballard, George Turner, Maggie Gee, Paolo Bacigalupi, Ruth Ozeki, and Yoko Tawada.

demonstrate that the authors are both indebted to a century old tradition and inventively looking for new ways of expressing the pretraumatic stress syndrome common in contemporary society This book is written for an academic audience postgraduates researchers and academics specialising in British Literature American Literature and Science Fiction Studies

Apocalyptic Visions in the Anthropocene and the Rise of Climate Fiction Kübra Baysal, 2021-08-10 With the increasing interest of pop culture and academia towards environmental issues which has simultaneously given rise to fiction and artworks dealing with interdisciplinary issues climate change is an undeniable reality of our time In accordance with the severe environmental degradation and health crises today including the COVID 19 pandemic human beings are awakening to this reality through climate fiction cli fi which depicts ways to deal with the anthropogenic transformations on Earth through apocalyptic worlds as displayed in works of literature media and art Appealing to a wide range of readers from NGOs to students this book fills a gap in the fields of literature media and art and sheds light on the inevitable interconnection of humankind with the nonhuman environment through effective descriptions of associable conditions in the works of climate fiction

The Cambridge Companion to Twenty-First Century American Fiction Joshua Miller, 2021-09-23 This volume explores the most exciting trends in 21st century US fiction s genres themes and concepts [African Climate Futures](#) Carl Death, 2025-06-10 African Climate Futures shows how climate changed futures are imagined in Africa and by Africans and how these future visions shape political debates and struggles in the present Scientific climate scenarios forecast bleak futures with increased droughts floods lethal heatwaves sea level rises declining crop yields and greater exposure to vector borne diseases Yet African climate futures could also encompass energy transitions and socio economic revolutions transformed political agency and human subjectivities and radically reparative more than human climate politics At the heart of the book is an original and interdisciplinary approach It studies official climate policy strategies and fictional texts side by side as ecopolitical imaginaries that envision low carbon climate changed futures and narrate pathways from here to there It discusses net zero strategies from Ethiopia The Gambia Nigeria South Africa and Zimbabwe and draws on postcolonial feminist and queer theory arguing that Africanfuturist climate fiction can inspire more radical reparative more than human ecopolitical imaginaries These stories can help us to understand the debts we all owe imagine what reparations might entail and explore the contours of living convivially alongside more than human others in heterotopian climate changed futures Stories can help explore how we might feel in climate changed futures and can help us to narrate a path through them This book uses Africanfuturist climate fiction to inspire new ways of challenging and enriching theoretical debates in global climate change politics including how we understand the places temporalities ecologies and politics of climate futures If we want to survive to tell new stories in liveable futures then we need to urgently and radically transform carboniferous capitalism Oxford Studies in African Politics and International Relations is a series for scholars and students working on African politics and International Relations and related disciplines Volumes concentrate on contemporary developments in

African political science political economy and International Relations such as electoral politics democratization decentralization gender and political representation the political impact of natural resources the dynamics and consequences of conflict comparative political thought and the nature of the continent's engagement with the East and West Comparative and mixed methods work is particularly encouraged Case studies are welcomed but should demonstrate the broader theoretical and empirical implications of the study and its wider relevance to contemporary debates The focus of the series is on sub Saharan Africa although proposals that explain how the region engages with North Africa and other parts of the world are of interest Series Editors Nic Cheeseman University of Birmingham Peace Medie University of Bristol and Ricardo Soares de Oliveira University of Oxford

Reimagining Science Fiction Gary Westfahl, 2025-10-31 In the first decades of the twenty first century science fiction literature has been transformed in many ways as the genre has reacted to the dominating influence of films television and video games the growing popularity of fantasy the rise of young adult science fiction and graphic novels the impact of the internet and social media and the increasing diversity of the authors characters and often non Western settings The essays making up this volume address these and other changes in two ways Some consider new critical approaches to science fiction in response to changing circumstances including analyses of how evolutionary psychology explains today's science fiction the emerging subgenre of cli fi exploring the effects of climate change the use of science fiction in different areas of the college curriculum and a statistical method for identifying works of science fiction Others examine significant new authors such as Nalo Hopkinson Charles Stross Paolo Bacigalupi Suzanne Collins Mira Grant John Sandford and David Mura Contributors include science fiction author Howard V Hendrix and experts in the fields of Chinese studies gender studies literature philosophy and religion

Modelling the Energy Transition Robert Matthias Erdbeer, Veit Hagenmeyer, Klaus Stierstorfer, 2025-07-05 This open access book reconfigures Energy Transition as a global discourse from a multidisciplinary perspective Energy Transition is not only one of the most daring technological endeavours of the present it is also its new master narrative Focusing on modelling both as a cultural technique and as a strategy of innovation the chapters provided in this volume throw into relief the visions but also the blind spots of modelling the challenges of climate change Thus in a rare encounter major voices from the Sciences and the Humanities from Energy Systems Design Mechanical Engineering Theory of Science Science and Technology Studies Literary Studies and the Arts have gathered here to overcome the cultural divide between the technological and the societal dimensions of this global task In doing so they offer a new form of model criticism pointing to the impacts of what may be termed the Energy Imaginary on the technosocial mindsets of our time

Understanding Public Debates Jens Martin Gurr, 2024-06-20 By historicizing and contextualizing them through readings of carefully selected literary texts literary studies can contribute to understanding and rationalizing key debates waged in many pluralist societies today whether on different conceptions of liberty identity politics historical commemoration challenges of globalization or responses to climate change *Understanding Public Debates*

presents case studies including Milton's *Paradise Lost*, P. B. Shelley's 1820 Reform essay, Philip Roth's *The Human Stain*, the songwriting of Neil Young and Edward Young's 1720s Sea Odes, recent climate fiction as well as non-literary conflict narratives. Rather than mining texts for arguments for or against certain positions, this book is interested in how texts stage these debates by means of multiple perspectives, narrative situations or ambiguities. By suggesting how educators might use literary texts as conversation starters for more rational debates, the volume also contributes to Public Literary Studies. Three important fields are here brought together: 1. the study of societal debates and conflicts and the ways in which they challenge pluralist societies; 2. explorations of the societal functions of literature and of non-literary narratives; and 3. discussions of the role and functions of literary studies. The book ends with ten crisp theses on how literary studies can contribute to understanding and rationalizing such conflictive debates.

New Approaches to the Twenty-First-Century Anglophone Novel Sibylle Baumbach, Birgit Neumann, 2019-12-20. This book discusses the complex ways in which the novel offers a vibrant arena for critically engaging with our contemporary world and scrutinises the genre's political, ethical and aesthetic value. Far-reaching cultural, political and technological changes during the past two decades have created new contexts for the novel which have yet to be accounted for in literary studies. Addressing the need for fresh transdisciplinary approaches that explore these developments, the book focuses on the multifaceted responses of the novel to key global challenges including migration and cosmopolitanism, posthumanism and ecosickness, human and animal rights, affect and biopolitics, human cognition and anxieties of inattention and the transculturality of terror. By doing so, it testifies to the ongoing cultural relevance of the genre. Lastly, it examines a range of 21st-century Anglophone novels to encourage new critical discourses in literary studies.
