Users Manual for the Texas Quick-load Method for Foundation Load Testing H. D. Butler, Horace E. Hoy, Horace E. Roy, 1976 The Texas State Department of Highways and Public Transportation has developed and implemented a quick load method for load testing piling and drilled shafts Using this method a load test can be completed in a relatively short time of one to two hours On small projects where the time consuming AASHTO test cannot be economically justified use of this test makes it feasible to use full scale load tests to verify foundation designs on these jobs The purpose of the information presented herein is to assist highway engineers in understanding using and applying quick load test methods Additionally it will provide them with the information necessary to prepare specifications and cost estimates for quick load testing
