The Village Enlightenment in America Craig Hazen, 2000-01-05 The Village Enlightenment in America focuses on three nineteenth century spiritual activists who epitomized the marriage of science and religion fostered in antebellum pre Darwinian America by the American Enlightenment A theologian writer and apologist for the nascent Mormon movement as well as an amateur scientist Orson Pratt wrote Key to the Universe or a New Theory of Its Mechanism to establish a scientific base for the Church of Jesus Christ of Latter day Saints Robert Hare an inventor and ardent convert to spiritualism used his scientific expertise to lend credence to the spiritualist movement Phineas Parkhurst Quimby generally considered the initiator of the American mind cure movement developed an overtly religious concept of science and used it to justify his system of theology Pratt Hare and Quimby all employed a potent combination of popular science and Baconianism to legitimate their new religious ideas Using the same terms matter ether magnetic force to account for the behavior of particles planetary rotation and the influence of the Holy Ghost these agents of the Enlightenment constructed complex systems intended to demonstrate a fundamental harmony between the physical and the metaphysical Through the lives and work of these three influential men The Village Enlightenment in America opens a window to a time when science and religion instead of seeming fundamentally at odds with each other appeared entirely reconcilable The Golden Rule and Odd-fellows Family Companion ,1846 *The Athenaeum* ,1850 **New-Church Messenger** ,1894
