Synthetic Biodegradable Polymer Scaffolds Anthony Atala, David J. Mooney, 2013-11-11 This body of work represents the first volume of a book series covering the field of tissue engineering Tissue engineering which refers to a category of therapeutic or diagnostic products and processes which are based upon a combination of living cells and biomaterials was defined as a field only a few years ago 1988 Tissue engineering is an inherently interdisciplinary field combining bioengineering life sciences and clinical sciences The definition of this area of work as the field of tissue engineering brought together scientists from multiple backgrounds who already were working toward the achievement of similar goals Why a book series exclusively devoted to tissue engineering The field of tissue engineering is heterogeneous The cells involved in tissue engineering can be autologous allogeneic or xenogeneic The biomaterials utilized can be either naturally occurring synthetic or a combination of both The application of the technology can be either for acute or permanent purposes An attempt to cover the field of tissue engineering in a single volume with the degree of detail necessary for individuals with different scientific backgrounds and disciplines would be a difficult task to accomplish particularly when this field is just emerging and changing rapidly Therefore addressing different technologies within the field of tissue engineering in a comprehensive manner is the main mission of this series of volumes A stellar group of scientists has been brought together to form the editorial board of the series **Synthetic Biodegradable Polymer Scaffolds** Anthony Atala, David J.

Mooney, 1997 Brings together articles from leading researchers in the field of the synthesis and properties of biodegradable polymers utilized in tissue engineering It should provide guidance on potential new materials or applications in the tissue engineering field Synthetic Biodegradable Polymer Scaffolds Anthony Atala, 2017-07-26 Synthetic Biodegradable Polymer Scaffolds By Anthony Atala **Ligament Tissue Engineering Using Synthetic Biodegradable Polymer Fiber Scaffolds** Victor S. A Manual For Biomaterials/scaffold Fabrication Technology Gilson Khang,Moon Suk Kim,Hai Bang Lee,2007-07-03 Tissue engineering has been recognized as offering an alternative technique to whole organ and tissue transplantation for diseased failed or malfunctioned organs To reconstruct a new tissue via tissue engineering the following triad components are needed 1 cells which are harvested and dissociated from the donor tissue 2 biomaterials as scaffold substrates in which

cells are attached and cultured resulting in implantation at the desired site of the functioning tissue and 3 growth factors which promote and or prevent cell adhesion proliferation migration and differentiation Of these three key components scaffolds play a critical role in tissue engineering This timely book focuses on the preparation and characterization of scaffold biomaterials for the application of tissue engineered scaffolds More importantly it serves as an experimental guidebook on the standardization of the fabrication process and characterization of scaffolding technology

Degradable Polymers G. Scott, 2013-03-14 The emphasis in degradable polymers has changed since the first edition of this book Biomedical and agricultural applications remain important topics of scientific and commercial interest in the second edition However an increased emphasis on composting as a means of recovering value from wastes has led to a new impetus to understand how plastics degrade in the environment and the implication of this for international standards Polymers based on renewable resources are also a major topic in this edition but the debate continues about their long term sustainability and ecological advantages over degradable man made polymers Degradable Polymers will be of interest not only to academic and industrial scientists working on packaging agricultural and medical applications of plastics but also to students of environmental science and legislators concerned with the effects of man made materials in the environment
