Achieving sustainable cultivation of rice Volume 2 Prof. Takuji Sasaki, 2017-05-22 Summarises advances in cultivation practices to close yield gaps including more efficient irrigation and nutrition techniques Discusses innovative methods of climate smart cultivation such as integrated crop management and the system of rice intensification SRI Reviews the latest research on insect pests weeds and integrated pest management Biological Approaches to Regenerative Soil Systems Norman Uphoff, Janice Thies, 2023-10-27 Agriculture in the 21st century will need considerable modification to remain both productive and sustainable Greater production is needed to meet the needs of our still growing populations and to combat hunger and poverty Declines in soil health and the pollution of water sources are making many of our production systems less tenable These adverse trends are exacerbated more and more by the impacts of climate change There are fortunately alternative methods available for agricultural practice that can countervail these constraints Biological Approaches to Regenerative Soil Systems brings together the work of both researchers and practitioners to map out better approaches to contemporary agriculture that draw upon both old and new knowledge It presents the science that underlies more biologically driven strategies as well as contemporary innovative experiences in diverse parts of the world Both accepted research and these varied experiences encourage confidence that these approaches not relying primarily on the introduction of new varieties and on exogenous inputs can succeed This book updates and revises a preceding volume Biological Approaches to Sustainable Soil Systems published by CRC Press in 2006 So much has been learned and done on this subject in the past decade and a half that a second edition was warranted For instance the first edition was published knowledge about plant soil microbiomes which are a frequent focus in this book has mushroomed Because sustainability is a broad term and an end state the editors preferred to assemble expertise regarding regenerative agriculture which is concerned with the means for achieving sustainability The concept of regenerative soil systems entities that are more complex and multifaceted than soil alone also incorporates a concern with having more resilient agricultural systems ones that are better able to cope with the multiple stresses of climate change that are foreseen for the decades ahead The book's chapters representing a wide range of disciplines were contributed by 84 scientists and practitioners from 20 countries Although they come from persons with in depth knowledge of their respective fields the chapters are written to be accessible to readers who are not trained in the specialized subjects Taken together the chapters provide students researchers practitioners planners and policy makers with a comprehensive understanding of both the science and the steps needed to regenerate and sustain soil systems around the world for the long term benefit of humankind and the environment

Sustainable Solutions for Food Security Atanu Sarkar, Suman Ranjan Sensarma, Gary W. vanLoon, 2019-01-18 This volume is the first centralized source of technological and policy solutions for sustainable agriculture and food systems resilience in the face of climate change The editors have compiled a comprehensive collection of the latest tested replicable

green technologies and approaches for food security including smart crops and new agricultural paradigms sustainable natural resources management and strategies for risk assessment and governance Studies from resource constrained countries with vulnerable populations are emphasized with contributions on multisector partnership from development professionals Debates concerning access to climate smart technologies intellectual property rights and international negotiations on technology transfer are also included The editors are respectively a public health physician a development professional and an environmental scientist They bring their varied perspectives together to curate a holistic volume that will be useful for policy makers scientists community based organizations international organizations and researchers across the world *Handbook for Farmer Field School on Climate Smart Agriculture in coastal/delta Zone, Myanmar* Food and Agriculture Organization of the United Nations, Association of Volunteers in International Service Foundation, 2019-05-15 The FAO is implementing a project entitled Sustainable Cropland and forest management in priority agro ecosystems of Myanmar SLM GEF in coordination with the Ministry of Natural Resources and Environmental Conservation MoNREC and the Ministry of Agriculture Livestock and Irrigation MoALI with funding from the Global Environment Facility GEF The project promotes climate smart agriculture CSA policies and practices at different levels in Myanmar In the field the project is active in five pilot Townships from three different agro ecological zones implementing various relevant CSA initiatives mainly using Farmer Field Schools FFS models In order to implement FFS effectively the project has developed FFS Curricula for each of the above mentioned three agro ecological zones with support from AVSI Foundation as a Service Provider Similarly the project has developed a FFS Handbook for each agro ecological zone both in Myanmar and English version with support from AVSI Foundation as a Service Provider This handbook is intended to help the Extension Workers FFS Facilitators and FFS Committee farmers to implement FFS on CSA techniques and practices in different agro ecological zones and scaling up the learnings in similar areas of Myanmar [Sustaining Soil Productivity in Response to Global Climate Change](#) Thomas J. Sauer, John Norman, Mannava V. K. Sivakumar, 2011-05-23 Sustaining Soil Productivity in Response to Global Climate Change Science Policy and Ethics is a multi disciplinary volume exploring the ethical political and social issues surrounding the stewardship of our vital soil resources Based on topics presented by an international group of experts at a conference convened through support of the Organization for Economic Co operation and Development chapters include scientific studies on carbon sequestration ecosystem services maintaining soil fertility and the effects of greenhouse gas emissions as well as ethical issues ranging from allocation of land use to policies needed for climate change adaptation and mitigation Bringing together the latest research in soil science and climatology Sustaining Soil Productivity in Response to Global Climate Change is a valuable resource for soil and plant scientists agronomists and environmental scientists as well as agricultural and natural resources engineers and economists environmental policy makers and conservationists Key Features Written by an international group of authors representing a cross section of scientists thought leaders and policy makers

Includes chapters on the potential effects of climate change on forest soil carbon microbial function and the role of soils and biogeochemistry in the climate and earth system Explores historical development of land use ethics and stewardship **The System of Rice Intensification** Norman Uphoff, Prof Norman T Uphoff, 2015-12-12 The System of Rice Intensification known as SRI is a management strategy for crop improvement Its ideas insights and practices are based on scientifically validated knowledge for increasing the production of not only irrigated rice but of other crops as well SRI represents a paradigm shift in agricultural thinking and practice toward agroecological farming that can be used by even the poorest smallholding farmers in ecologically fragile regions of the world to achieve food security in the face of the climate change challenges ahead When the author Norman Uphoff first learned about SRI in Madagascar in 1993 this production system which offered higher yields with reduced inputs seemed implausible to him But the professor put aside his skepticism after seeing farmers who had been getting rice yields of just two tons per hectare produce four times more rice for three years in a row on their very poor soils not changing their varieties or relying on agrochemical inputs and using less water Now he is helping to disseminate this dramatically effective methodology with this accessible easy to use sourcebook It offers explanations research references vivid pictures and concrete examples of the award winning SRI methodology to anyone interested in the development of practicable sustainable food systems Now he is helping to disseminate this revolutionary methodology with this accessible easy to use primer It offers explanations resources and concrete examples of the award winning SRI to anyone interested in the development of practicable sustainable food systems Rice Productivity and Food Security in India Poornima Varma, 2017-07-11 This book contributes to the adoption of agricultural technology in general and to literature on the System of Rice Intensification SRI in particular by identifying the factors that influence the decision to adopt SRI and examining SRI's impact on household income and yield The study also discusses the importance of SRI in achieving higher rice productivity and food security Conducted on behalf of the Government of India's Ministry of Agriculture from October 2014 to March 2016 the study collected detailed and extensive household level data As the second largest producer and consumer India plays an important role in the global rice economy Food security in India has been traditionally defined as having a sufficient supply of rice at an affordable price However in recent years rice cultivation in India has suffered from several interrelated problems Increased yields achieved during the green revolution period and with the help of input intensive methods involving high water and fertiliser use are now showing signs of stagnation and concomitant environmental problems due to salinisation and waterlogging of fields Water resources are also limited as such water for irrigation must contend with increasing industrial and urban needs As a result of all these factors rice farmers have experienced a downturn in productivity growth Since increasing the area of rice cultivation is not feasible the additional production has to be achieved using less land less water and fewer additional inputs The new intensification methods for rice cultivation known as the System of Rice Intensification SRI which originated in Madagascar offer a promising systemic

approach to enhancing rice production at affordable costs by simultaneously reducing input requirements and causing less harm to the environment The SRI approach is expected to enhance yield and substantially reduce water and other input requirements by altering plant soil water and nutrient management practices With SRI taking firm root in India the book examines and analyses the adoption and the economic impact of SRI in three major rice producing States of India Karnataka Madhya Pradesh and Orissa

Sustaining Global Food Security Robert Zeigler, 2019-10-09 Population growth alone dictates that global food supplies must increase by over 50% in coming decades Advances in technology offer an array of opportunities to meet this demand but history shows that these can be fully realised only within an enabling policy environment Sustaining Global Food Security makes a compelling case that recent technological breakthroughs can move the planet towards a secure and sustainable food supply only if new policies are designed that allow their full expression Bob Zeigler has brought together a distinguished set of scientists and policy analysts to produce well referenced chapters exploring international policies on genetic resources molecular genetics genetic engineering crop breeding and protection remote sensing the changing landscape of agricultural policies in the world's largest countries and trade Those entering the agricultural sciences and those who aspire to influence public policy during their careers will benefit from the insights of this unique set of experiences and perspectives
