Serious Games Development and Applications Minhua Ma, Manuel Fradinho Oliveira, Joao Madeiras Pereira, 2012-02-21 This book constitutes the refereed proceedings of the Second International Conference on Serious Games Development and Applications SGDA 2011 held in Lisbon Portugal in September 2011 The 13 revised full papers presented were carefully reviewed and selected for publication Among the topics addressed are virtual reality computer assisted learning computer graphics tutoring systems e learning e culture and guiding systems **Mobile Lightweight Wireless Systems** Periklis Chatzimisios, Christos Verikoukis, Ignacio Santamaria, Massimiliano Laddomada, Oliver Hoffmann, 2010-11-30 Following the success of the First MOBILIGHT 2009 in Athens Greece the Second International Conference on Mobile Lightweight Systems MOBILIGHT was held in Barcelona Spain on May 10 12 2010 It was not an easy decision to carry on organizing a scientific event on wireless communications where competition is really enormous This decision was motivated by discussion with many colleagues about the current unprecedented demand for lig weight wireless communication devices with high usability and performance able to support added value services in a highly mobile environment Such devices follow the users

everywhere they go at work at home while travelling in a classroom etc and result in exciting research development and business opportunities Such scenarios clearly demand significant upgrades to the existing communication paradigm in terms of infrastructure devices and services to support the anytime anywhere any device philosophy providing novel and fast evolving requirements and expectations on search and development in the field of information and communication technologies The core issue is to support wireless users desire for 24 7 network availability and transparent access to their own services In this context we continue to envision an international forum where practitioners and researchers coming from the many areas involved in lightweight wireless systems design and deployment would be able to interact and exchange experiences

Black Enterprise ,2010-02 Mobile Wireless Middleware, Operating Systems, and Applications Ying Cai,Thomas Magedanz,Minglu Li,Jinchun Xia,Carlo Giannelli,2010-11-30 The advances in wireless communication technologies and the proliferation of mobile devices have enabled the realization of intelligent environments for people to communicate with each other interact with information processing devices and receive a wide range of mobile wireless services through various types of networks and systems everywhere anytime A key enabler of this pervasive and ubiquitous connectivity environments is the advancement of software technology in various communication sectors ranging from communication middleware and operating systems to networking protocols and applications The international conference series on Mobile Wireless Middleware Operating Systems and Applications MOBILWARE is dedicated to address emerging topics and challenges in various mobile wireless software related areas The scope of the conference includes the design implementation deployment and evaluation of middleware operating systems and applications for computing and communications in mobile wireless systems MOBILWARE 2010 was the third edition of this conference which was made possible thanks to the sponsorship of ICST and Create Net and most importantly the hard work of the TPC and reviewers Similar to the last successful editions we had 35 submissions from 23 different countries this year reflecting the international interest for the conference topics After a thorough review process we finalized an excellent technical program including 18 regular papers and 4 short papers

The Herald ,2010 **Digital Image and Signal Processing for Measurement Systems** J. Richard Duro,Lopez Fernando Pena,2022-09-01 This book provides an overview of advanced digital image and signal processing techniques that are currently being applied in the realm of measurement systems The book is a selection of extended versions of the best papers presented at the Sixth IEEE International Workshop on Intelligent Data Acquisition and Advanced Computing Systems Technology and Applications IDAACS 2011 related to this topic and encompass applications that go from multidimensional imaging to evoked potential detection in brain computer interfaces The objective was to provide a broad spectrum of measurement applications so that the different techniques and approaches could be presented Digital Image and Signal Processing for Measurement Systems concentrates on signal processing for measurement systems and its objective is to provide a general overview of the area and an appropriate introduction to the topics considered This is

achieved through 10 chapters devoted to current topics of research addressed by different research groups within this area. These 10 chapters reflect advances corresponding to signals of different dimensionality. They go from mostly one dimensional signals in what would be the most traditional area of signal processing realm to RGB signals and to signals of very high dimensionality such as hyperspectral signals that can go up to dimensionalities of more than one thousand. The chapters have been thought out to provide an easy to follow introduction to the topics that are addressed including the most relevant references so that anyone interested in this field can get started in the area. They provide an overview of some of the problems in the area of signal and image processing for measurement systems and the approaches and techniques that relevant research groups within this area are employing to try to solve them which in many instances are the state of the art of some of these topics.
