### **Steven Lukes Power A Radical View:**

Power Steven Lukes, 2021 The third edition of this seminal work includes the original text first published in 1974 the updates and reflections from the second edition and two groundbreaking new chapters Power A Radical View assesses the main debates about how to conceptualize and study power including the influential contributions of Michel Foucault The new material includes a development of Lukes s theory of power and presents empirical cases to exemplify this Including a refreshed introduction this third edition brings a book that has consolidated its reputation as a classic work and a major reference point within Social and Political Theory to a whole new audience It can be used on modules across the Social and Political Sciences dealing with the concept of power and its manifestation in the world It is also essential reading for all undergraduate and postgraduate students interested in the history of Social and Political Thought Publisher s website

Power Steven Lukes, 2005      **The Circular Structure of Power** Torben Bech Dyrberg, 1997 Few concepts in social theory have been used so extravagantly in recent years as the notion of power Yet despite its inflated presence the term is still unclear and undertheorized In *The Circular Structure of Power* Torben Dyrberg rises to the challenge of conceptualizing power through a philosophical examination of its uses in contemporary social theory Drawing on the insights of Michel Foucault Ernesto Laclau and Chantal Mouffe Dyrberg brings this continental tradition into a creative dialogue with the Anglo American tradition represented by figures such as Steven Lukes William Connolly Peter Bachrach and Morton Baratz Moreover Dyrberg moves from such abstract considerations to their implications for political and democratic theory through an examination of the work of thinkers as diverse as Robert Dahl John Rawls Jürgen Habermas and Nicos Poulantzas Simultaneously engaging with and defying many of the dominant definitions of power Torben Dyrberg destabilizes and undermines the conventional distinctions and polarities through which power is usually understood The new perspective offered to us by this investigation is one which goes beyond the assumption that power can be based on and derived from either agency or structure as if these categories themselves were not somehow constituted by power      **Power,**

**Participation, and Policy** Katsuhiko Masaki, 2007-01-01 *Power Participation and Policy* proposes an alternative approach to making sense of popular participation in the policy process in light of the subtle workings of power in society This study based on field research carried out in Nepal illustrates that the policy process is implicated in a web of cultural politics experienced by different stakeholders namely their daily struggles to suture rifts in their identities in the face of competing demands arising from their daily social interaction The constant renegotiations of the overall policy direction among decision makers combined with the contested nature of the policy implementation on the ground provide a fertile ground for ordinary people to exert leverage over the unfolding of policymaking Masaki therefore draws the conclusion that a potential for the emancipation of ordinary people is immanent in the day to day flow of policymaking      **Making Social Science Matter**

Bent Flyvbjerg, 2001-01-15 New approach demonstrating how social science can be successful focusing on context values and

power

**On the Concept of Power** Guido Parietti, 2022 Power is the central organizing concept for politics. However, despite decades of debate across political science, sociology, and philosophy, scholars have not yet settled on a proper definition of power. Political science has looked at how power works, but according to Guido Parietti, it fails to define what power means. Bringing together different disciplinary discourses, *On the Concept of Power* examines the conditions for power to have an actual referent in other words for politics to appear in our world. In this original and ambitious critique of the prevailing approaches to political theory and political science, Parietti examines what it means to have power and what may endanger our access to and exercise of it.

*Power: A Reader* Mark Haugaard, 2002 An introductory guide to some of the most significant perspectives on the subject of power within social and political theory.

*The Transparency Paradox* Ida Koivisto, 2022 Transparency has become an unquestionable good in modern society, spreading from its origins in governance to most arenas of the modern world. But is it always good? This book turns a critical eye towards transparency, deconstructing its theoretical preconceptions and seeking a more nuanced view of what it means to be transparent.

**Justice and Power in Sociolegal Studies** Bryant G. Garth, Austin Sarat, 1998 *Justice and Power in the Sociolegal Studies* asks what interdisciplinary work in the law and society tradition tells us about the relationship of law and justice as well as the way power operates in and through law. The fundamental concepts of justice and power provide points of departure for leading scholars to explore the various domains of socio-legal research. As they note the explicitness of the engagement with issues of power and the relative silence about or indirectness in taking on questions of justice found in most law and society research, they ask how engagement with issues of power and silence about justice constituted law and society as a research field caught between a desire to have political impact and at the same time to maintain its scientific respectability.

**Handbook on Planning and Power** Michael Gunder, Kristina Grange, Tanja Winkler, 2023-05-09 Drawing on research from diverse thinkers in urban planning and the built environment, this Handbook articulates the cutting edge of contemporary understandings about power and its impact on planning. It identifies the current state of knowledge about planning and power as well as emerging trajectories within this field of research.
