Women's Club Football in Brazil and Colombia Mark Biram, 2024-01-15 The first women's football book on Latin America centring the perspectives of players brings rare interview material that cuts through the clichés to uncover the lived reality of women footballers. It includes the first large scale survey of South American women footballers' views into dialogue with institutional and media perspectives. The early chapters consider the backdrop Latin American women footballers operate in a media and institutional panorama that privileges a heteronormative athletic femininity whilst ensuring women's football is never portrayed as anything other than an inferior version of the hegemonic men's game. Following this drawing on nine months of ethnographic fieldwork in which 33 semi-structured interviews were carried out with players and institutional figures, this pioneering book foregrounds the lived reality of women's football in three strategic locations. Firstly three months were spent in the Amazon region of Brazil where Esporte Clube Iranduba provides a fascinating alternative model for the growth of women's football. This is contrasted with Santos FC where women's football tends to be constantly overshadowed by the presence of banal patriarchy and finally with another fleeting glimpse of how another model is possible at Atlético Huila of Colombia, the surprise winner of the women's Copa Libertadores in 2018.

21st Century Media and Female Mental Health Fredrika Thelandersson, 2022-10-22 This open access book examines the conversations around gendered mental health in contemporary Western media culture. While early 21st century media was marked by a distinct focus on happiness, productivity and success, during the 2010s negative feelings and discussions

around mental health have become increasingly common in that same media landscape This book traces this turn to sadness in women s media culture and shows that it emerged indirectly as a result of a culture overtly focused on happiness By tracing the coverage of mental health issues in magazines among female celebrities and on social media this book shows how an increasingly intimate media environment has made way for a profitable vulnerability that takes the shape of marketable and brand friendly mental illness awareness that strengthens the authenticity of those who embrace it But at the same time sad girl cultures are proliferating on social media platforms creating radically honest spaces where those who suffer get support and more capacious ways of feeling bad are formed Using discourse analysis and digital ethnography to study contemporary representations of mental illness and sadness in Western popular media and social media this book takes a feminist media studies approach to popular discourse understanding the conversations happening around mental health in these sites to function as scripts for how to think about and experience mental illness and sadness
