

THE PROP BUILDER'S MOLDING & CASTING HANDBOOK

This is the first book to contain, in one comprehensive volume, every molding and casting procedure of use to the theater props builder (no matter what his or her level of proficiency). The author demonstrates the techniques involved in using more than thirty different materials ranging from papier-mâché to breakaway glass.

While the use of some materials—plaster and polyester resins, for example—is covered to some extent in other publications, information on the selection and use of rubber materials (latex, neoprene, silicone, and the urethanes) and the procedure for making breakaway windows and bottles is available only in *The Prop Builder's Molding & Casting Handbook*.

Written in an easy, conversational style, the book will be useful to anyone involved with theater properties, puppetry, and costuming (as professionals or amateurs). It also will serve admirably the needs of students taking classes in these subjects.

Completing the book is a special section on designing and building a vacuum forming machine suitable for use in constructing theater props. More than 450 photographs illustrate the step-by-step procedures explained throughout the entire text.

Author of the critically-acclaimed *Theater Props Handbook*, Thomson James lives in Sherman Oaks, California. He is Properties Master of the UCLA Theater Department.
