*Processual Tonality and the Psychoacoustics of Chromaticism* Kyle Hutchinson, 2025 In this book Kyle Hutchinson develops a theory of how chromaticism in late nineteenth and early twentieth century European and North American art music affects the ways in which we hear interpret and process pitch relationships The theoretic models developed within suggest ways in which default interpretation of pitch relationships can be undermined by various patterns of pitch behavior While the music discussed in the volume is primarily concert music and opera Richard Strauss Florence Price and Alma Mahler form the bulk of the examples the methodologies are broadly applicable beyond these genres and can be applied to Jazz and contemporary popular music as well      The Orchestra: Orchestral combination Ebenezer Prout, 1899
