Harlan M. C. Field

The Postcatastrophe Economy Rebuilding America And Avoiding The Next Bubble:

We Have Never Been Postmodern Steve Redhead, 2011-06-29 Is it possible that various disciplines theorists and cultural commentators have been hurtling down a blind alley in the last thirty years searching for the holy grail of the postmodern What if after all we have never have been postmodern Or what if we are instead now living after postmodernity As global culture rushes off the cliff of catastrophe with its neo liberal neo conservative ideologies mangled in the process this book provides theory at the speed of light designed to capture the fast flickering images of the real gone before you can blink in today s accelerated culture

Keynes and Modern Economics Ryuzo Kuroki, 2012 It is a little over seventy years since John Maynard Keynes produced his magnum opus *The General Theory of Employment Interest and Money* Keynes staggering achievement has been to remain relevant to economics and other disciplines even today and this book reflects that with an examination on his influence on modern economics Leading economists from a variety of backgrounds including Ed Nell and Heinz Kurz have joined forces in this volume with internationally respected Japanese scholars to produce a strong collection of contributions to the debate on Keynes monumental legacy This book will be vital reading for historians of economic thought economic methodologists as well as those economists with an interest in the overall development of their discipline

The Postcatastrophe Economy Eric Janszen, 2010-09-02 How government and business can work together to secure our economic future The 2008 crisis was just the beginning according to sought after analyst Eric Janszen an even bigger financial catastrophe is imminent Inclined to disbelieve him He predicted the last two busts months before they happened Our problems according to Janszen are rooted in the flaws of the debt driven FIRE economy Finance Insurance and Real Estate Applying the tried and true methods of currency depreciation tax and interest rate cuts and fiscal stimulus will not work this time around The only way out is to change our fundamental approach The solution is to use private and public monies to develop major for profit transportation energy and communications infrastructure projects These projects will spark employment and growth reduce U S dependence on foreign energy and our foreign debt and improve the efficiency of the economy for all growth industries in the twenty first century This thought provoking book offers solutions for a more sustainable and stable economic future

The New Age of Catastrophe Alex Callinicos, 2023-04-05 The world is entering a new age of catastrophe The exceptional is becoming normal The last such crisis between 1914 and 1945 witnessed two world wars the Great Depression and the Holocaust Now humankind faces fresh existential threats the COVID 19 pandemic wildfires floods and other extreme weather events caused by accelerating climate change and the danger of nuclear war in the wake of Russia s invasion of Ukraine These threats argues Alex Callinicos have their common source in a multidimensional crisis of the capitalist system which is hitting the buffers hurling us towards societal collapse It embraces the increasing destruction of nature and the degradation of labour a world economy stagnant since the global financial crisis and escalating inter imperialist conflicts between the United States China and Russia So far the main political beneficiary has

been the far right which may capture the White House again But the new age of catastrophe is also an age of revolt Following on from Black Lives Matter the MeToo protests and the revolts in Sudan Sri Lanka and Iran multiple faultlines in the system will provoke still more mass movements that can challenge myriad forms of oppression and open the way to a just and sustainable world

The New Nationalism--How The Next Great American Debate Will Restore Our Country By Recasting Our Politics Harlan M. C. Field,2012-07-10 In this book Harlan Field boldly asks modern Americans to leave behind their old politics which have placed America's greatness in jeopardy and exhorts us to pursue a new political strategy that will assure America's great tradition for its future generations As we enter a new millennium Harlan observes we stand poised to discard the crowning achievement of the last thousand years the modern Nation State The only known entity that is capable of preserving Freedom and opportunity for the individual justice for the masses a healthy environment a stable society and a vibrant economy is falling victim to the seemingly invincible juggernaut of Globalism The five cardinal prerogatives of a free people are all being surrendered with little debate and even less thought The rights of a sovereign people to formulate their own independent foreign policy to raise and command a national army to admit or exclude aliens to levy tariffs on goods of foreign manufacture and to coin their own money are under attack all over the world through such peculiar pretenders to legitimacy as the North American Free Trade Agreement NAFTA the General Agreement on Tariffs and Trade GATT and the European Union E U W e no longer can even remember what makes a group of people into a nation A common culture a common heritage a common language shared goals shared sacrifice shared progress This book is a must read for our politicians on the left and on the right lest because of party politics America is made to give into a secondary role on the world stage of ruthless politics and demagoguery

How Are You Going to Pay for That? Ryan Cooper,2025-09-23 A compelling alternative view of the relationship between our politics and our economy Throughout America structural problems are getting worse Economic inequality is near Gilded Age heights the healthcare system is a mess and the climate crisis continues to grow Yet most ambitious policy proposals that might fix these calamities are dismissed as wastefully expensive by default From the kitchen table to Congress debates are punctuated with a familiar refrain How are you going to pay for that This question is designed to shut down policy pushes up front minimizing any interference with the free market It comes from neoliberalism an economic ideology that has overtaken both parties Proponents insist that markets are naturally occurring and apolitical and that too much manipulation of the economy will make our society fall apart Ryan Cooper argues that our society already is falling apart and the logically preposterous views of neoliberalism are to blame Most progressives understand this instinctively but many lack the background knowledge to

make effective economic counterarguments *How Are You Going To Pay For That* is filled with engaging discussions and detailed strategies that policymakers and citizens alike can use to assail even the most entrenched lines of neoliberal logic and start to undo these long held misconceptions Equal parts economic theory history and political polemic this is an essential roadmap for winning the key battles to come **Dams in Japan** Japan Commission on Large Dams - JCOLD,2009-04-15 Overview of Japan s long water history by the Japanese Commission on large dams Starting from the 7th century when irrigation ponds were first constructed for paddy cropping until the beginning of the 21st century Elaborates on various roles of dams water supply power generation and flood control Moreover tries to clarify the negative impacts of dams on the natural environment and local societies as well as extensive efforts made to minimize these impacts Includes appendices with location and characteristics of main dams administrative organs river management system and water resources development river systems and facilities to offer the full picture Richly illustrated Intended for dam and water resources professionals *Bulletin of the Atomic Scientists* ,1980-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world
