Statistical Methods for Hospital Monitoring with R Anthony Morton, Kerrie L. Mengersen, Geoffrey Playford, Michael Whitby, 2013-06-27 Hospitals monitoring is becoming more complex and is increasing both because staff want their data

analysed and because of increasing mandated surveillance This book provides a suite of functions in R enabling scientists and data analysts working in infection management and quality improvement departments in hospitals to analyse their often non independent data which is frequently in the form of trended over dispersed and sometimes auto correlated time series this is often difficult to analyse using standard office software This book provides much needed guidance on data analysis using R for the growing number of scientists in hospital departments who are responsible for producing reports and who may have limited statistical expertise This book explores data analysis using R and is aimed at scientists in hospital departments who are responsible for producing reports and who are involved in improving safety Professionals working in the healthcare quality and safety community will also find this book of interest Statistical Methods for Hospital Monitoring with R Provides functions to perform quality improvement and infection management data analysis Explores the characteristics of complex systems such as self organisation and emergent behaviour along with their implications for such activities as root cause analysis and the Pareto principle that seek few key causes of adverse events Provides a summary of key non statistical aspects of hospital safety and easy to use functions Provides R scripts in an accompanying web site enabling analyses to be performed by the reader http://www.wiley.com/go/hospital_monitoring Covers issues that will be of increasing importance in the future such as generalised additive models and complex systems networks and power laws

Statistical Monitoring of Complex Multivariate Processes Uwe Kruger, Lei Xie, 2012-08-06 The development and application of multivariate statistical techniques in process monitoring has gained substantial interest over the past two decades in academia and industry alike Initially developed for monitoring and fault diagnosis in complex systems such techniques have been refined and applied in various engineering areas for example mechanical and manufacturing chemical electrical and electronic and power engineering The recipe for the tremendous interest in multivariate statistical techniques lies in its simplicity and adaptability for developing monitoring applications In contrast competitive model signal or knowledge based techniques showed their potential only whenever cost benefit economics have justified the required effort in developing applications Statistical Monitoring of Complex Multivariate Processes presents recent advances in statistics based process monitoring explaining how these processes can now be used in areas such as mechanical and manufacturing engineering for example in addition to the traditional chemical industry This book Contains a detailed theoretical background of the component technology Brings together a large body of work to address the field's drawbacks and develops methods for their improvement Details cross disciplinary utilization exemplified by examples in chemical mechanical and manufacturing engineering Presents real life industrial applications outlining deficiencies in the methodology and how to address them Includes numerous examples tutorial questions and homework assignments in the form of individual and team based projects to enhance the learning experience Features a supplementary website including Matlab algorithms and data sets This book provides a timely reference text to the rapidly evolving area of multivariate statistical analysis for academics advanced level

students and practitioners alike Introduction to Probability and Statistics for Ecosystem Managers Timothy C. Haas, 2013-05-21 Explores computer intensive probability and statistics for ecosystem management decision making Simulation is an accessible way to explain probability and stochastic model behavior to beginners This book introduces probability and statistics to future and practicing ecosystem managers by providing a comprehensive treatment of these two areas The author presents a self contained introduction for individuals involved in monitoring assessing and managing ecosystems and features intuitive simulation based explanations of probabilistic and statistical concepts Mathematical programming details are provided for estimating ecosystem model parameters with Minimum Distance a robust and computer intensive method The majority of examples illustrate how probability and statistics can be applied to ecosystem management challenges There are over 50 exercises making this book suitable for a lecture course in a natural resource and or wildlife management department or as the main text in a program of self study Key features Reviews different approaches to wildlife and ecosystem management and inference Uses simulation as an accessible way to explain probability and stochastic model behavior to beginners Covers material from basic probability through to hierarchical Bayesian models and spatial spatio temporal statistical inference Provides detailed instructions for using R along with complete R programs to recreate the output of the many examples presented Provides an introduction to Geographic Information Systems GIS along with examples from Quantum GIS a free GIS software package A companion website featuring all R code and data used throughout the book Solutions to all exercises are presented along with an online intelligent tutoring system that supports readers who are using the book for self study *Statistical DNA Forensics* Wing Kam Fung, Yue-Qing Hu, 2008-04-15 Statistical methodology plays a key role in ensuring that DNA evidence is collected interpreted analyzed and presented correctly With the recent advances in computer technology this methodology is more complex than ever before There are a growing number of books in the area but none are devoted to the computational analysis of evidence This book presents the methodology of statistical DNA forensics with an emphasis on the use of computational techniques to analyze and interpret forensic evidence Quality of Life Outcomes in Clinical Trials and Health-Care Evaluation Stephen J. Walters, 2009-09-10 An essential up to date guide to the design of studies and selection of the correct QoL instruments for observational studies and clinical trials Quality of Life QoL outcomes or Person Patient Reported Outcome Measures PROMs are now frequently being used in randomised controlled trials RCTs and observational studies This book provides a practical guide to the design analysis and interpretation of studies that use such outcomes QoL outcomes tend to generate data with discrete bounded and skewed distributions Many investigators are concerned about the appropriateness of using standard statistical methods to analyse QoL data and want guidance on what methods to use QoL outcomes are frequently used in cross sectional surveys and non randomised health care evaluations Provides a user friendly guide to the design and analysis of clinical trials and observational studies in relation to QoL outcomes Discusses the problems caused by QoL outcomes and presents intervention

options to help tackle them Guides the reader step by step through the selection of appropriate QoLs Features exercises and solutions and a supporting website providing downloadable data files Illustrated throughout with examples and case studies drawn from the author s experience this book offers statisticians and clinicians guidance on choosing between the numerous available QoL instruments

Operational Risk Management Ron S. Kenett,Yossi Raanan,2011-06-20 Models and methods for operational risks assessment and mitigation are gaining importance in financial institutions healthcare organizations industry businesses and organisations in general This book introduces modern Operational Risk Management and describes how various data sources of different types both numeric and semantic sources such as text can be integrated and analyzed The book also demonstrates how Operational Risk Management is synergetic to other risk management activities such as Financial Risk Management and Safety Management Operational Risk Management a practical approach to intelligent data analysis provides practical and tested methodologies for combining structured and unstructured semantic based data and numeric data in Operational Risk Management OpR data analysis Key Features The book is presented in four parts 1 Introduction to OpR Management 2 Data for OpR Management 3 OpR Analytics and 4 OpR Applications and its Integration with other Disciplines Explores integration of semantic unstructured textual data in Operational Risk Management Provides novel techniques for combining qualitative and quantitative information to assess risks and design mitigation strategies Presents a comprehensive treatment of near misses data and incidents in Operational Risk Management Looks at case studies in the financial and industrial sector Discusses application of ontology engineering to model knowledge used in Operational Risk Management Many real life examples are presented mostly based on the MUSING project co funded by the EU FP6 Information Society Technology Programme It provides a unique multidisciplinary perspective on the important and evolving topic of Operational Risk Management The book will be useful to operational risk practitioners risk managers in banks hospitals and industry looking for modern approaches to risk management that combine an analysis of structured and unstructured data The book will also benefit academics interested in research in this field looking for techniques developed in response to real world problems

Time Series Data Analysis Using EViews I. Gusti Ngurah Agung,2011-08-31 Do you want to recognize the most suitable models for analysis of statistical data sets This book provides a hands on practical guide to using the most suitable models for analysis of statistical data sets using EViews an interactive Windows based computer software program for sophisticated data analysis regression and forecasting to define and test statistical hypotheses Rich in examples and with an emphasis on how to develop acceptable statistical models Time Series Data Analysis Using EViews is a perfect complement to theoretical books presenting statistical or econometric models for time series data The procedures introduced are easily extendible to cross section data sets The author Provides step by step directions on how to apply EViews software to time series data analysis Offers guidance on how to develop and evaluate alternative empirical models permitting the most appropriate to be selected without the need for computational formulae Examines a variety of times

series models including continuous growth discontinuous growth seemingly causal regression ARCH and GARCH as well as a general form of nonlinear time series and nonparametric models Gives over 250 illustrative examples and notes based on the author s own empirical findings allowing the advantages and limitations of each model to be understood Describes the theory behind the models in comprehensive appendices Provides supplementary information and data sets An essential tool for advanced undergraduate and graduate students taking finance or econometrics courses Statistics life sciences and social science students as well as applied researchers will also find this book an invaluable resource **Statistical Practice in Business and Industry** Shirley Coleman,Tony Greenfield,Dave Stewardson,Douglas C. Montgomery,2008-04-15 This book covers all the latest advances as well as more established methods in the application of statistical and optimisation methods within modern industry These include applications from a range of industries that include micro electronics chemical automotive engineering food component assembly household goods and plastics Methods range from basic graphical approaches to generalised modelling from designed experiments to process control Solutions cover produce and process design through manufacture to packaging and delivery from single responses to multivariate problems
