

General Description

Section 1

1.1 Introduction

The STAAD analysis engine is described in this section. The STARDYNE analysis engine is discussed in Section 6.

This section of the manual contains a general description of the analysis and design facilities available in STAAD. Specific informations on Steel, Concrete, and Timber design are available in Sections 2, 3, and 4 of this manual, respectively. Detailed command formats and other specific user information is presented in Section 5.

The objective of this section is to familiarize the user with the basic principles involved in the implementation of the various analysis/design facilities offered by the STAAD engine. As a general rule, the sequence in which the facilities are discussed follows the recommended sequence of their usage in the input file.

1.2 Input Generation

See Section 5

The user communicates with STAAD through an input file. The input file is a text file consisting of a series of commands which are executed sequentially. The commands contain either instructions or data pertaining to analysis and/or design. The
