Neoliberalism and Climate Policy in the United States Robert MacNeil, 2017-07-06 This book explores how Washington s efforts to act on climate change have been translated under conditions of American neoliberalism where the state struggles to find a stable and legitimate role in the economy and where environmental and industrial policy are enormously contentious topics This original work conceptualizes US climate policy first and foremost as a question of innovation policy with capital accumulation and market domination as its main drivers It argues that US climate policy must be understood in the context of Washington s broader efforts over the past four decades to dominate and monopolize novel high tech markets and its use of immense amounts of state power to achieve this end From this perspective many elements of US climate politics that seem confusing or contradictory actually appear to have an obvious and consistent logic This book will be of particular interest to students and scholars of IPE as well as individuals generally interested in gaining a stronger understanding of US climate politics and policy and the role and influence of neoliberalism on contemporary economic governance

How to Make an

Entrepreneurial State Rainer Kattel, Wolfgang Drechsler, Erkki Karo, 2022-09-13 A ground breaking account which shows how the public sector must adapt but also persevere in order to advance technology and innovation From self driving cars to smart grids governments are experimenting with new technologies to significantly change the way we live Innovation has become vitally important to states across the world Rainer Kattel Wolfgang Drechsler and Erkki Karo explore how public

bodies pursue innovation looking at how new policies are designed and implemented Spanning Europe the USA and Asia the authors show how different institutions finance new technologies and share cutting edge information They argue for the importance of agile stability demonstrating that in order to successfully innovate state organizations have to move nimbly like start ups and yet ensure stability at the same time And that particularly in the light of the Covid 19 pandemic governments need both long term policy and dynamic capabilities to handle crises This vital account explores the complex and often contradictory positions of innovating public bodies and shows how they can overcome financial and political resistance to change for the good of us all

The DARPA Model for Transformative Technologies: Perspectives on the U.S. Defense Advanced Research Projects Agency William Boone Bonvillian, Richard Van Atta, Patrick Windham, 2020-01-09

The authors have done a masterful job of charting the important story of DARPA one of the key catalysts of technological innovation in US recent history By plotting the development achievements and structure of the leading world agency of this kind this book stimulates new thinking in the field of technological innovation with bearing on how to respond to climate change pandemics cyber security and other global problems of our time The DARPA Model provides a useful guide for governmental agency and policy leaders and for anybody interested in the role of governments in technological innovation Dr Kent Hughes Woodrow Wilson International Center for Scholars This volume contains a remarkable collection of extremely insightful articles on the world s most successful advanced technology agency Drafted by the leading US experts on DARPA it provides a variety of perspectives that in turn benefit from being presented together in a comprehensive volume It reviews DARPA s unique role in the U S innovation system as well as the challenges DARPA and its clones face today As the American model is being considered for adoption by a number of countries worldwide this book makes a welcome and timely contribution to the policy dialogue on the role played by governments in stimulating technological innovation Prof Charles Wessner Georgetown University The U S Defense Advanced Research Projects Agency DARPA has played a remarkable role in the creation new transformative technologies revolutionizing defense with drones and precision guided munitions and transforming civilian life with portable GPS receivers voice recognition software self driving cars unmanned aerial vehicles and most famously the ARPANET and its successor the Internet Other parts of the U S Government and some foreign governments have tried to apply the DARPA model to help develop valuable new technologies But how and why has DARPA succeeded Which features of its operation and environment contribute to this success And what lessons does its experience offer for other U S agencies and other governments that want to develop and demonstrate their own transformative technologies This book is a remarkable collection of leading academic research on DARPA from a wide range of perspectives combining to chart an important story from the Agency s founding in the wake of Sputnik to the current attempts to adapt it to use by other federal agencies Informative and insightful this guide is essential reading for political and policy leaders as well as researchers and students interested in understanding the success of this agency and the lessons it offers to others

Transforming Industrial Policy for the Digital Age Patrizio Bianchi, Clemente Ruiz Durán, Sandrine Labory, 2019 This book argues that digital globalization is inducing deep and productive transformations making industrial policy necessary in order to reorientate development towards inclusive and more sustainable growth The book also demonstrates that industrialization remains an important development process for emerging countries Regarding the future of jobs the authors show how the substitution of labour in automation is not inevitable since technology is also complementary to human capital Policymakers should pay more attention to the new skills that will be required A particular concern is the rapid change in technology and business compared to institutions which take time to adapt Territories have an important role to play in order to speed up institutional adaptation providing they can act coherently with the other levels of government **The Entrepreneurial State** Mariana Mazzucato, 2018-03-22 10TH ANNIVERSARY EDITION UPDATED WITH A NEW PREFACE Superb At a time when government action of any kind is ideologically suspect and entrepreneurship is unquestioningly lionized the book's importance cannot be understated Guardian According to conventional wisdom innovation is best left to the dynamic entrepreneurs of the private sector and government should get out of the way But what if all this was wrong What if from Silicon Valley to medical breakthroughs the public sector has been the boldest and most valuable risk taker of all A brilliant book Martin Wolf Financial Times One of the most incisive economic books in years Jeff Madrick New York Review of Books Mazzucato is right to argue that the state has played a central role in producing game changing breakthroughs Economist Read her book It will challenge your thinking Forbes **An Ungovernable Foe** Natalie B. Aviles, 2024-01-23 Winner 2024 Choice Outstanding Academic Title In American politics medical innovation is often considered the domain of the private sector Yet some of the most significant scientific and health breakthroughs of the past century have emerged from government research institutes The U S National Cancer Institute NCI is tasked with both understanding and eradicating cancer and its researchers have developed a surprising expertise in virus research and vaccine development An Ungovernable Foe examines seventy years of federally funded scientific breakthroughs in the laboratories of the NCI to shed new light on how bureaucratic organizations nurture innovation Natalie B Aviles analyzes research and policy efforts around the search for a viral cause of leukemia in the 1960s the discovery of HIV and the development of AIDS drugs in the 1980s and the invention of the HPV vaccine in the 1990s She argues that the NCI transformed generations of researchers into innovative public servants who have learned to balance their scientific and bureaucratic missions These scientist bureaucrats are simultaneously committed to conducting cutting edge research and stewarding the nation's investment in cancer research and as a result they have developed an unparalleled expertise Aviles demonstrates how the interplay of science politics and administration shaped the NCI into a mission oriented agency that enabled significant breakthroughs in cancer research and in the process she shows how organizational cultures indelibly stamp scientific work *Government-Linked Companies and Sustainable, Equitable Development* Terence Gomez, François

Bafoil, Kee-Cheok Cheong, 2014-11-27 The debate over how far governments should intervene in economies in order to promote economic growth a debate which from the 1980s seemed settled in favour of the neo liberal non interventionist consensus has taken on new vigour since the financial crisis of 2008 and after Some countries most of them in industrialised Asia have survived the crisis and secured equitable economic growth by adopting a developmental state model whereby governments have intervened in their economies often through explicit support for individual companies This book explores debates about government intervention assesses interventionist policies including industrial and innovation policies and examines in particular the key institutions which play a crucial role in implementing government policies and in building the bridge between the state and the private sector The countries covered include China India South Korea Malaysia and Taiwan together with representative countries from Europe and Latin America Knowledge Governance Reasserting the Public Interest, Anna Célia Castro, Rainer Kattel, 2014-10-01 This book argues that the current international intellectual property rights regime led by the World Trade Organization WTO has evolved over the past three decades toward overemphasizing private interests and seriously hampering public interests in access to knowledge and innovation diffusion This approach concentrates on tangible and codified knowledge creation and diffusion in research and development R D that can be protected via patents and other intellectual property rules and regulations In terms of global policy initiatives however it is becoming increasingly clear that the WTO in particular is mostly a conflict resolution facility rather than a global governance body able to generate cooperation and steer international coordinated policy action At the same time rent extraction and profits streaming from legal hyperprotection have become pervasively important for firm strategies to compete in a globalized marketplace Knowledge Governance Reasserting the Public Interest offers a novel approach knowledge governance in order to move beyond the current regime
