The first part contains an interview with Zhidong Bai conducted by Dr Atanu Biswas from the Indian Statistical Institute and seven short articles detailing Bai's contributions. The second part is a collection of his selected seminal papers in the areas of random matrix theory, Edgeworth expansion, M-estimation, model selection, adaptive design in clinical trials, applied probability in algorithms, small area estimation, and time series, among others. Advances in Statistics Zhidong Bai, Zehua Chen, Jin-Ting Zhang, Feifang Hu, 2008 Throughout history men have repeatedly made judgments regarding their own conduct and that of their fellow men. Some acts have been judged to be right or good while other acts have been denounced as wrong or evil. Ethical judgment in medicine as in other areas of life is an attempt to distinguish between good and bad conduct. This book is based on three lectures given by the author as the Medical Director of Eye Clinic Singapore International. The first lecture was an address delivered to medical undergraduates at the National University of Singapore in 1975. The second was a Commonwealth Medical Association lecture delivered a decade ago. The third was a Singapore Medical Association lecture delivered in 1981. This volume emphasizing the principles of medical ethics has been kept simple and brief and it is hoped that it will make interesting reading for both medical professionals and the general public.
