

This function is pointed out by the following message on the instrument cluster display after switching off the ignition.

❏ Check SAFELock Owner's manual

❏ CHECK DEADLOCK

After locking the vehicle, the warning light in the driver's door flashes for around 2 seconds in quick succession, afterwards it begins to flash evenly at longer intervals.

#### Switching off

The safe lock can be switched off in one of the following ways.

- By locking twice within 2 seconds.
- By disabling the button for interior monitoring and anti-towing = [page 57](#), Interior monitor and towing protection.

The indicator light in the driver door flashes for about 2 seconds fast, goes out and starts to flash at longer intervals after about 30 seconds.

If the vehicle is locked and the safe securing system is switched off, the door can be opened separately from the inside by a single pull on opening lever.

The Safelock system switches back on when the vehicle is locked.

#### ⚠ WARNING

If the car is locked and the safe securing system activated, no people must remain in the car as it will then not be possible to either unlock a door or open a window from the inside. The locked doors make it more difficult for rescuers to get into the vehicle in an emergency - risk to life!

#### Individual settings

❏ Read and observe ⚠ and ⚡ on page 52 first.

The following central locking functions can be individually set via the MAXI DOT display = [page 47](#), Menu item Settings.

#### Opening a single door

The function allows you to unlock only the driver's door and the fuel filler flap with the radio remote control. KESSY makes it possible to release individual doors as well as the fuel filler flap, depending on the area in which the key is located. The other doors and the boot lid are only unlocked when the unlocking is repeated.

#### Unlocking a vehicle side door

This function enables you to unlock both doors on the driver's side and the fuel filler flap with the radio remote control unit. KESSY makes it possible to release of both doors on one side as well as the fuel filler flap, depending on the area in which the key is located. The other doors and the boot lid are only unlocked when the unlocking is repeated.

#### Unlock all doors

The function allows you to unlock all doors, the boot lid and the fuel filler flap.

#### Automatic locking/unlocking

The function allows you to lock all doors and the boot lid from a speed of about 15 km/h. The button in the handle of the boot lid is deactivated.

All doors and the boot lid are automatically unlocked again by removing the ignition key or by opening any of the doors. In vehicles with the KESSY system, this is when any door is opened.

The vehicle can also be unlocked by pressing the Central Locking Button Ⓢ in the centre console = [page 54](#).

#### Acoustic signals when locking / unlocking

For vehicles with anti-theft alarm system, the acoustic signals can be activated / deactivated by means of the MAXI DOT display = [page 47](#).

#### Opening/closing a door

Fig. 38 Door handle/door opening lever

❏ Read and observe ⚠ and ⚡ on page 52 first.

#### Opening from the outside

- › Unlock the vehicle.
- › Pull on the door handle (A) in the direction of the arrow = [Fig. 38](#).
