book's full color images and user friendly format provide quick and easy access to today's most important information on cancer in the small animal patient. Full color format throughout and full color illustrations make information more accessible and provide accurate representations of clinical appearance. Chapters are clustered into four major sections: The Biology and Pathogenesis of Cancer; Diagnostic Procedures for the Cancer Patient; Therapeutic Modalities for the Cancer Patient; and Specific Malignancies in the Small Animal Patient. The consistent format includes incidence and risk factors; pathology; natural behavior of tumors; history and clinical signs; diagnostic techniques and workup; treatment options; and prognosis for specific malignancies in the small animal cancer patient. Features cutting edge information on the complications of cancer pain management and the latest treatment modalities. The latest information on the etiology of cancer including genetic, chemical, physical, and hormonal factors as well as cancer causing viruses. Coverage of molecular targeted therapy of cancer plus new and emerging therapeutic techniques. New information on molecular diagnostic procedures for the cancer patient. The latest diagnostic imaging techniques in clinical oncology. Discussions of compassion and supportive care from chronic pain management and nutrition to end of life issues and grief support.

Withrow and MacEwen's Small Animal Clinical Oncology Stephen J. Withrow, Rodney Page, David M. Vail, 2012-11-13

With a unique focus on the most effective interventional techniques, Withrow and MacEwen's Small Animal Clinical Oncology 5th Edition tells the full story of cancer in dogs and cats: what it is, how to diagnose it, and how to treat many of the most common cancers encountered in clinical practice. Nearly 500 color photographs, diagrams, x-rays, and gross views depict the clinical manifestations of various cancers. This edition covers the latest advances in clinical oncology, including chemotherapy, surgical oncology, and diagnostic techniques. With contributions from 65 veterinary oncology experts, this authoritative reference is a must-have for current evidence-based therapeutic strategies on canine and feline oncology. I really love this book. If you are interested in veterinary oncology, have a flick through this book online or at a conference when you get the chance. I hope that you agree with me that this is the definitive oncology reference source for the early 21st century and that you feel compelled to buy it. Your patients will thank you for it.

Cutting edge information on the complications of cancer pain management and the latest treatment modalities prepares you to diagnose and treat pets with cancer rather than refer cases to a specialist. A consistent format for chapters on body system tumors includes coverage of incidence and risk factors; pathology; natural behavior of tumors; history and clinical signs; diagnostic techniques and workup; treatment options; and prognosis for specific malignancies. A systems approach to the diagnosis and management of cancer facilitates access to information about the many malignancies affecting small animal patients. Nearly 500 color images provide accurate depictions of specific diseases and procedures. Helpful drug formularies provide quick access to information on indications, toxicities, and recommended dosages for chemotherapeutic and analgesic drugs used in cancer treatment. Expert contributors
