Smart Things Ubiquitous Computing User Experience Design Rar:

Smart Things Mike Kuniavsky, 2010-09-14 The world of smart shoes appliances and phones is already here but the practice of user experience UX design for ubiquitous computing is still relatively new Design companies like IDEO and frogdesign are regularly asked to design products that unify software interaction device design and service design which are all the key components of ubiquitous computing UX and practicing designers need a way to tackle practical challenges of design Theory is not enough for them luckily the industry is now mature enough to have tried and tested best practices and case studies from the field Smart Things presents a problem solving approach to addressing designers needs and concentrates on process rather than technological detail to keep from being quickly outdated It pays close attention to the capabilities and limitations of the medium in question and discusses the tradeoffs and challenges of design in a commercial environment Divided into two sections frameworks and techniques the book discusses broad design methods and case studies that reflect key aspects of these approaches The book then presents a set of techniques highly valuable to a practicing designer It is intentionally not a comprehensive tutorial of user centered design as that is covered in many other books but it is a handful of techniques useful when designing ubiquitous computing user experiences In short Smart Things gives its readers both the why of this kind of design and the how in well defined chunks Tackles design of products in the post Web world where computers no longer have to be monolithic expensive general purpose devices Features broad frameworks and processes practical advice to help approach specifics and techniques for the unique design challenges Presents case studies that describe in detail how others have solved problems managed trade offs and met successes *Intelligent Software Methodologies, Tools and Techniques* Hamido Fujita, Ali Selamat, 2015-05-06 This book constitutes the best papers selection from the proceedings of the 13th International Conference on Intelligent Software Methodologies Tools and Techniques SoMeT 2014 held in Langkawi Malaysia in September 2014 The 27 full papers presented were carefully reviewed thoroughly revised or enlarged and selected as best papers from the 79 published proceedings papers which had originally been selected from 192 submissions The papers are organized in topical sections on artificial intelligence techniques in software engineering requirement engineering high assurance system intelligent software systems design creative and arts in interactive software design software methodologies for reliable software design software quality and assessment for business enterprise software analysis and performance model software applications systems *Designing Connected Products* Claire Rowland, Elizabeth Goodman, Martin Charlier, Ann Light, Alfred Lui, 2015-05-18 Networked thermostats fitness monitors and door locks show that the Internet of Things can and will enable new ways for people to interact with the world around them But designing connected products for consumers brings new challenges beyond conventional software UI and interaction design This book provides experienced UX designers and technologists with a clear and practical roadmap for approaching consumer product strategy and design in this novel market By drawing on the best of current design practice and academic

research Designing Connected Products delivers sound advice for working with cross device interactions and the complex ecosystems inherent in IoT technology
