Smart Urbanism Utopian Vision False:

Smart Urbanism Simon Marvin, Andrés Luque-Ayala, Colin McFarlane, 2015-12-14 Smart Urbanism SU the rebuilding of cities through the integration of digital technologies with buildings neighbourhoods networked infrastructures and people is being represented as a unique emerging solution to the majority of problems faced by cities today SU discourses enacted by technology companies national governments and supranational agencies alike claim a supremacy of urban digital technologies for managing and controlling infrastructures achieving greater effectiveness in managing service demand and reducing carbon emissions developing greater social interaction and community networks providing new services around health and social care etc Smart urbanism is being represented as the response to almost every facet of the contemporary urban question This book explores this common conception of the problematic of smart urbanism and critically address what new capabilities are being created by whom and with what exclusions how these are being developed and contested where is this happening both within and between cities and with what sorts of social and material consequences The aim of the book is to identify and convene a currently fragmented and disconnected group of researchers commentators developers and users from both within and outside the mainstream SU discourse including several of those that adopt a more critical perspective to assess what problems of the city smartness can address The volume provides the first internationally comparative assessment of SU in cities of the global north and south critically evaluates whether current visions of SU are able to achieve their potential and then identifies alternative trajectories for SU that hold radical promise for reshaping cities Developing National Urban Policies Debolina Kundu, Remy Sietchiping, Michael Kinyanjui, 2020-08-17 This book discusses and analyzes past and ongoing national urban policy development efforts from around the globe particularly those that can lead the way toward smart and green cities In view of the adoption of the UN's 2030 Agenda for Sustainable Development especially the goal to have cities that are inclusive safe resilient and sustainable urban policies that can help achieve this goal are urgently needed The UN Habitat HABITAT III puts national urban policies at the heart of implementing and rethinking the urban agenda and identifies them as being integral to the equitable and sustainable development of nations Against this background this important book which gathers contributions from academics planners and urban specialists reviews existing urban policies from developing and developed nations discusses various countries smart and green urban policies and outlines the way forward As such it is essential reading for all social scientists planners designers architects and policymakers working on urban development around the world **Beware of smart people! Redefining the smart city paradigm towards inclusive urbanism** Stollmann, Jörg, Wolf, Konrad, Brück, Andreas, Frank, Sybille, Million, Angela, Misselwitz, Philipp, Schlaack, Johanna, Schröder, Carolin, 2016-11-30 The Smart City paradigm aims at resource efficient urban development by means of ICT implementation Cities where we work and conduct our research are building Smart City strategies and that research institutions increasingly fund research into the development of smart infrastructure

and Smart Cities are considered a radical paradigm shift and motors of technological innovation economic growth higher quality of life efficiency and risk control in the face of shrinking resources and impending climate change This smartification is contrasted by increasing calls by civil society and urban social movements for more encompassing inclusion in decision making New urban actors are acquiring agency through situated knowledge local expertise social networking and cooperation and collaboration skills Behind these movements a seemingly parallel discourse to the Smart City paradigm is gaining ground the discourse of the commons Commons are defined as the combination of resources people and practices resources which are defined and managed by a group of people of commoners and a practice of commoning that looks after takes care for and fosters this resource without exhausting it Commoning is a practice that seems closer than any other practice to a sustainable way of life Are these two discourses the discourse on the Smart City and the discourse on the urban commons irreconcilable antagonists or do they share a common ground which needs to be uncovered developed and advocated This question is by no means merely theoretical It is also a very practical question which pertains to the management and distribution of the resources we depend on It is a very political question as it demands negotiation and the taking of sides And it is an ethical question in that it relates to how we respect and stand up for each other our fellow human beings and also the non human nature for which we are responsible The essays and transcripts of the symposium Beware of Smart People want to make a first contribution and stimulate future research in the field Das Paradigma der Smart City ist Ausdruck der Ambition Stadtentwicklung durch die Anwendung von IKT effizient und Ressourcen schonend zu gestalten Städte in denen wir arbeiten und bei der wir forschen entwickeln Smart City Strategien und Forschungsförderung spezialisiert sich zunehmend auf die Entwicklung smarter Infrastrukturen und Steuerungsmechanismen Smart Cities werden als radikaler Paradigmenwechsel gelesen und als Motoren technologischer Entwicklung ökonomisches Wachstum höhere Lebensqualität Effizienz und Risikokontrolle angesichts abnehmender Ressourcen und drohenden Klimawandels Dieser Smartifizierung stehen die zunehmenden Forderungen zivilgesellschaftlicher Gruppen und sozialer Bewegungen für mehr und umfassendere Einbindung in Entscheidungsprozesse entgegen Neue urbane Akteure werden zu Agenten indem sie ihre Erfahrungswissen ihre lokalen Kenntnisse ihre sozialen Netzwerke und Fähigkeiten zur Kooperation und Kollaboration einbringen Hintergrund diese Bewegungen ist ein augenscheinlich paralleler Diskurs zur Smart City welcher sich zunehmend Gehör verschafft der Diskurs bei der Gemeingüter die Commons Commons werden definiert als das Zusammenspiel von Ressourcen Menschen und Praktiken Ressourcen die von einer Gemeinschaft den Commonern definiert und verwaltet werden und eine Praxis des Commoning welche die Ressource schonend bewirtschaftet ohne sie zu verbrauchen In diesem Sinne scheint Commoning eine Praxis die einer nachhaltigen Lebensweise am nächsten kommt Sind diese zwei Diskurse der Diskurs bei der Smart City und jener bei der urbanen Gemeingüter unvereinbare Antagonisten oder teilen sie Gemeinsamkeiten welche offen gelegt weiter entwickelt und verfechtet werden sollten Diese Frage ist keineswegs eine rein theoretische Sie ist eine sehr

praktische Frage da sie auf das die Verteilung und das Management lebenswichtiger Ressourcen zielt Sie ist eine politische Frage da sie Auseinandersetzung und Parteinahme einfordert Und sie ist eine ethische Frage denn sie fordert gegenseitigen Respekt und Einsatz ein f r unsere Mitmenschen sowie f r die nichtmenschliche Natur f r die wir Verantwortung tragen Die Texte und Aufzeichnungen des Symposiums Beware of Smart People wollen hierzu einen Beitrag leisten und zuk nftige Forschungsvorhaben stimulieren

from URBAN DESIGN to LANDSCAPE URBANISM Sarıyya ARSLAN,Erkan POLAT,2025-04-16 Landscape Urbanism is a planning and design theory and a model of practice that argues that the best way to organize cities is through the design of the city s landscape rather than just the design of built or unbuilt areas In this context it is positioned within larger scale cultural historical and theoretical formations Landscape Urbanism is a response to the limited perception or depiction of the current project and site context by both Urban Planners and Architects and Landscape Architects It is also a concept that has been strategically introduced by these design and planning oriented professions and jobs especially in terms of Urban Design as a way to differentiate the context and is used more in a Western oriented way and has been put forward as a response to the increasingly undefined role that Landscape Architects find themselves in Landscape Urbanism describes the ability to produce urban effects that have traditionally been achieved through the construction of buildings on built up areas simply through the organization of horizontal surfaces Although first coined in the mid 1990s the term Landscape Urbanism has adopted many different uses but is most often associated with Urban Design and as a Postmodernist or even New Modernist response to the spatial scale failures of the New Urbanism the departure from comprehensive visions and demands for Modern architecture and Urban Planning

Digital (In)justice in the Smart City Debra Mackinnon,Ryan Burns,Victoria Fast,2022-12-21 In the contemporary moment smart cities have become the dominant paradigm for urban planning and administration which involves weaving the urban fabric with digital technologies Recently however the promises of smart cities have been gradually supplanted by recognition of their inherent inequalities and scholars are increasingly working to envision alternative smart cities Informed by these pressing challenges Digital In Justice in the Smart City foregrounds discussions of how we should think of and work towards urban digital justice in the smart city It provides a deep exploration of the sources of injustice that percolate throughout a range of sociotechnical assemblages and it questions whether working towards more just sustainable liveable and egalitarian cities requires that we look beyond the limitations of smartness altogether The book grapples with how geographies impact smart city visions and roll outs on the one hand and how unjust geographies are produced in smart pursuits on the other Ultimately Digital In Justice in the Smart City envisions alternative cities smart or merely digital and outlines the sorts of roles that the commons utopia and the law might take on in our conceptions and realizations of better cities

Urban Resilience: Methodologies, Tools and Evaluation Octavio Francisco González Castillo,Valentina Antoniucci,Enrique Mendieta Márquez,Margarita Juárez Nájera,Alberto Cedeño Valdiviezo,Mariana Osorno Castro,2023-01-10 This book presents a select set of papers from

an international and multidisciplinary approach outlining the vanguard in the field of methodology tools and evaluation of the movement towards urban resilience Reflecting on and redesigning the guidelines that orient the planning and management of urban development has become today an issue of global scope and priority that demands the committed and determined participation of society Faced with the formidable challenge of guiding our cities towards sustainability it is necessary to develop new approaches paradigms models methodologies and tools that make it possible to assess and raise the resilience profile of urban socio ecosystems The experiences that are developed in this book offer a wide and diverse set of concepts theories methodologies instruments and casuistry impregnated by resilience notion to inspire influence and guide thinking and practice for architects urban planners government officials businessmen civil and research organizations In this book the reader will be able to review either theoretical methodology to organize notions on urban resilience or application cases in a variety of areas and subsystems of a city but being all of them inevitably and intricately linked through a complex matrix of structures and interactions that determine future well being and resilience of urban socio ecosystems in the global anthropo environment

Planning in the USA Roger W. Caves, J. Barry Cullingworth, 2023-08-29 Extensively revised and updated Planning in the USA fifth edition continues to provide a comprehensive introduction to the policies theory and practice of planning Outlining land use urban planning and environmental protection policies this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified defined and approached The new edition incorporates new planning legislation and regulations at the state and federal layers of government and examples of local ordinances in a variety of planning areas New material includes discussions of education and equity in planning the City Beautiful Movement Daniel Burnham's plan for Chicago segregation Knick v Township of Scott reforming single family zoning and regulatory challenges in zoning and land use Daniel Parolek's Missing Middle Housing climate change mitigation adaptation and resiliency the drinking water crisis in Flint Michigan sharing programs for cars bicycles and scooters hybrid electric and autonomous vehicles Vision Zero COVID 19 relief for housing Innovation Districts Promise Zones and Opportunity Zones the sharing gig and creative economies scenic views and vistas monuments statues and remembering the past and healthy cities Health Impact Assessment and active living This detailed account of urbanization in the United States reveals the problematic nature and limitations of the planning process the fallibility of experts and the difficulties facing policy makers in their search for solutions Planning in the USA fifth edition is an essential book for students of urban planning urban politics environmental geography and environment politics It will be a valuable resource for planners and all who are concerned with the nature of contemporary urban and environmental problems

Seeing the City Digitally Gillian Rose, 2025-10-01 This book explores what's happening to ways of seeing urban spaces in the contemporary moment when so many of the technologies through which cities are visualised are digital Cities have always been pictured in many media and for many different purposes This edited collection explores how that picturing is changing in an era of digital visual culture

Analogue visual technologies like film cameras were understood as creating some sort of a trace of the real city Digital visual technologies in contrast harvest and process digital data to create images that are constantly refreshed modified and circulated Each of the chapters in this volume examines a different example of how this processual visibility is reconfiguring the spatial and temporal organisation of urban life

Research Handbook on the Sociology of Globalization Christian Karner, Dirk Hofäcker, 2023-07-01 This Research Handbook takes stock of the state of the art in sociological research on globalization and the contributors outline future trajectories for this one of the most pressing and challenging sociological themes of our time

Beyond the Networked City Olivier Coutard, Jonathan Rutherford, 2015-12-14 Cities around the world are undergoing profound changes In this global era we live in a world of rising knowledge economies digital technologies and awareness of environmental issues The so called modern infrastructural ideal of spatially and socially ubiquitous centrally governed infrastructures providing exclusive homogeneous services over extensive areas has been the standard of reference for the provision of basic essential services such as water and energy supply This book argues that after decades of undisputed domination this ideal is being increasingly questioned and that the network ideology that supports it may be waning In order to begin exploring the highly diverse fluid and unstable landscapes emerging beyond the networked city this book identifies dynamics through which a break with previous configurations has been operated and new brittle zones of socio technical controversy through which urban infrastructure and its wider meaning are being negotiated and fought over It uncovers across a diverse set of urban contexts new ways in which processes of urbanization and infrastructure production are being combined with crucial sociopolitical implications through shifting political economies of infrastructure which rework resource distribution and value creation through new infrastructural spaces and territorialities which rebundle socio technical systems for particular interests and claims and through changing offsets between individual and collective appropriation experience and mobilization of infrastructure With contributions from leading authorities in the field and drawing on theoretical advances and original empirical material this book is a major contribution to an ongoing infrastructural turn in urban studies and will be of interest to all those concerned by the diverse forms and contested outcomes of contemporary urban change across North and South

Smart Urbanism Utopian Vision False: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have charmed audiences this year. Smart Urbanism Utopian Vision False : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Smart Urbanism Utopian Vision False : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
