From trendy restaurants to city grids to TikTok and Netflix feeds, the world-round algorithmic recommendations dictate our experiences and choices. The algorithm is present in the familiar neon signs and exposed brick of Internet cafes, be it in Nairobi or Portland, and the skeletal modern furniture of Airbnbs in cities big and small. Over the last decade, this network of mathematically determined decisions has taken over almost unnoticed, informing the songs we listen to, the friends with whom we stay in touch, as we've grown increasingly accustomed to our insipid new normal. This ever-tightening web woven by algorithms is called *Filterworld*.

Kyle Chayka shows us how online and offline spaces alike have been engineered for seamless consumption becoming a source of pervasive anxiety in the process. Users of technology have been forced to contend with data driven equations that try to anticipate their desires and often get them wrong. What results is a state of docility that allows tech companies to curtail human experiences, human lives for profit. But to have our tastes, behaviors and emotions governed by computers while convenient does nothing short of call the very notion of free will into question. In *Filterworld*, Chayka traces this creeping machine guided curation as it infiltrates the furthest reaches of our digital, physical and psychological spaces. With algorithms increasingly influencing not just what culture we consume but what culture is produced, urgent questions arise: What happens when shareability supersedes messiness, innovation and creativity, the qualities that make us human? What does it mean to make a choice when the options have been so carefully arranged for us? Is personal freedom possible on the Internet? To the last question, *Filterworld* argues yes, but to escape *Filterworld* and even transcend it, we must first understand it. [Studies in the Victorian and Neo-Victorian Novel](#) Adrian Radu, 2024-02-29. Readers of the nineteenth century novel expected literature to be a form of journalism and fictional history. They wanted to read about easily identifiable situations with a chronological, straightforward and easily discernible development of plot, familiar backgrounds and credible characters. About a hundred years later, the Victorian novel became the great tradition, omnipresent and reliable. However, today the age and the context are different, and novels need more substance, including such themes as memory, race and empire, sex and science, spectrality and the heritage industry, or key issues like gender, sexuality and postmodernism. All these elements are considered Neo Victorian, which in spite of their novelty do point to a certain Victorian anchor. This volume contains ten studies, the substance of which is the analysis of novels that, according to their date of publication, are products of the Victorian and Neo Victorian periods as defined above. The authors investigate and discuss Victorian roots and characteristics, preserved or recycled Victorian themes, Neo Victorian characters and motifs, or any other characteristics that may label them as Victorian or Neo Victorian products. *Outrush* Errin Stevens, 2019-02-14. Maya's headlong rush into marriage isn't working out, and it isn't the only collision course she's on these days. Her saltwater distractions aside, her father-in-law wants her gunned down for reasons unknown, and her pesky bodyguard, when he's around, seems intent on drowning her in want and regret. Maya is desperate to hold onto any small part of herself she understands. When escape becomes her only option, she finds herself in a race against a past and a man she can't outrun.
