Smallpox The Fight To Eradicate A Global Scourge:

Smallpox David A. Koplow, 2003 Looks at the history of the smallpox virus providing an overview of the political biological environmental medical and legal issues surrounding the question of whether or not the virus should be exterminated Smallpox S.L. Kotar, J.E. Gessler, 2013-04-26 Scientifically known as Variola major the deadliest form of smallpox has plagued mankind since time immemorial This text chronicles the worldwide effects of the killer disease with particular emphasis on the 19th and 20th centuries including the devastations of the speckled disease during great armed conflicts Specific attention is paid to the development and utilization of Dr Edward Jenner s vaccination chronicling the anti vaccination movement the evolving concept of compulsory vaccination and the global march toward eradication Legal and moral challenges the National Vaccine Institute the treatment of American Indians and African Americans immigrants the often bloody quarantine battles germ warfare superstitions and home remedies are addressed from the historical perspectives of those who lived through and those who died of this scourge The Proceedings of the 19th Annual History of Medicine Days Conference 2010 Beth Cusitar, Aleksandra Loewenau, 2014-07-18 This volume is the second in a peer reviewed series of Proceedings Volumes from the Calgary History of Medicine Days conferences produced by Cambridge Scholars Publishing The History of Medicine Days is a two day national conference held annually at the University of Calgary Canada where undergraduate and early graduate students from across Canada the US the UK and Europe give paper and poster presentations on a wide variety of topics from the history of medicine and health care The selected 2010 conference papers assembled in this volume particularly comprise the history of Applications of Science to Medicine Nursing Public Health Illness and Disease Stigma and Gender Neurology and Psychiatry and Eugenics The 2010 keynote address was delivered by Distinguished Professor of the History of Nursing and Public Health Dr Geertje Boschma from the University of British Columbia Vancouver and is reprinted in the current volume This volume also includes the abstracts of all 2010 conference presentations and is well illustrated with diagrams and images pertaining to the history of medicine The Poet Zheng Zhen (1806-1864) and the Rise of Chinese Modernity Jerry D. Schmidt, 2013-06-20 In The Poet Zheng Zhen 1806 1864 and the Rise of Chinese Modernity J D Schmidt provides the first detailed study in a Western language of one of China s greatest poets and explores the nineteenth century background to Chinese modernity challenging the widely held view that this is largely of Western origin The volume contains a study of Zheng s life and times an examination of his thought and literary theory and four chapters studying his highly original contributions to poetry on the human realm nature verse narrative poetry and the poetry of ideas including his writings on science and technology Over a hundred pages of translations of his verse conclude the work **World on Fire** Mark Rowlands, 2021 The philosopher Mark Rowlands takes a novel perspective on the problem of climate change and how to address it With energy consumption at the core of the issue he claims climate extinction and pestilence as three epoch defining environmental issues of our time Rowlands proposes a

single solution to all three breaking our collective habit of eating animals Bringing to bear analytic rigor and empirical data Rowlands argues that reversing the industrial farming of animals for our consumption will both significantly reduce energy emissions and allow for free space to aggressively reforest land being used by industrial animal farms to mitigate the effects of climate change

Epidemics and Society Frank M. Snowden, 2019-10-22 A wide ranging study that illuminates the connection between epidemic diseases and societal change from the Black Death to Ebola This sweeping exploration of the impact of epidemic diseases looks at how mass infectious outbreaks have shaped society from the Black Death to today In a clear and accessible style Frank M Snowden reveals the ways that diseases have not only influenced medical science and public health but also transformed the arts religion intellectual history and warfare A multidisciplinary and comparative investigation of the medical and social history of the major epidemics this volume touches on themes such as the evolution of medical therapy plague literature poverty the environment and mass hysteria In addition to providing historical perspective on diseases such as smallpox cholera and tuberculosis Snowden examines the fallout from recent epidemics such as HIV AIDS SARS and Ebola and the question of the world's preparedness for the next generation of diseases

The Top Ten Diseases of All Time Stacey Smith?, 2023-10-24 Infectious diseases have been with us for millennia and continue to pose a threat from the irritation of flu season to the potential extinction of our species We instinctively fear them and alter our behaviour as a result The reason we bury bodies six feet deep is because that was the depth that stopped plague transmission from the dead in the Middle Ages Many religious practices such as avoiding certain meats were established because of foodborne disease transmission In The Top Ten Diseases of All Time Stacey Smith presents the top ten deadliest diseases and their effects on society providing a wealth of information about the trajectory and terrible impact of each disease and humanity's reaction to these diseases throughout the millennia Did you know for example that The medical symbol evolved from the worms wrapped around a stick because that was the only way to remove Guinea worms from the body so having a stick meant you were a doctor Smallpox is the third worst disease ever yet it remains the only successfully eradicated human disease but not for long thanks in part to a successful vaccine in part to photographic recognition cards and in part due to helicopter led forced vaccinations of whole villages in the former Yugoslavia This brings up issues of individual rights versus public good that remain relevant today Four diseases were targeted for eradication in the 20th century the failure to do so led directly to the creation of the environmental movement The inability of priests to explain how to stop the plague in the Middle Ages broke the back of the church as an all powerful and all knowing institution and led to colonialism and slavery The Top Ten Diseases of All Time offers a fascinating overview of the deadliest diseases to spread throughout the world including HIV AIDS Spanish Flu Measles The Black Death Smallpox and others

The Martians Have Landed! Robert E. Bartholomew, Benjamin Radford, 2011-11-08 History is replete with examples of media created scares and panics This book presents more than three dozen studies of media scares from the 17th century to the 21st century including hoaxes

perpetrated via newspapers radio television and cyberspace From the 1835 batmen on the Moon hoax to more recent bird flu scares and Hurricane Katrina myths this book explores hoaxes that highlight the impact of the media on our lives and its tendency to sensationalize Most of the hoaxes covered occurred in the United States though incidents from Europe Asia Africa South America and Australia are featured as well Several are global in scope revealing the power global media wields

A History of Public Health George Rosen, 2015-04-01 George Rosen's wide ranging account of public health's long and fascinating history is an indispensable classic Since publication in 1958 George Rosen's classic book has been regarded as the essential international history of public health Describing the development of public health in classical Greece imperial Rome England Europe the United States and elsewhere Rosen illuminates the lives and contributions of the field's great figures He considers such community health problems as infectious disease water supply and sewage disposal maternal and child health nutrition and occupational disease and injury And he assesses the public health landscape of health education public health administration epidemiological theory communicable disease control medical care statistics public policy and medical geography Rosen writing in the 1950s may have had good reason to believe that infectious diseases would soon be conquered But as Dr Pascal James Imperato writes in the new foreword to this edition infectious disease remains a grave threat Globalization antibiotic resistance and the emergence of new pathogens and the reemergence of old ones have returned public health efforts to the basics preventing and controlling chronic and communicable diseases and shoring up public health infrastructures that provide potable water sewage disposal sanitary environments and safe food and drug supplies to populations around the globe A revised introduction by Elizabeth Fee frames the book within the context of the historiography of public health past present and future and an updated bibliography by Edward T Morman includes significant books on public health history published between 1958 and 2014 For seasoned professionals as well as students **A History of Public Health** is visionary and essential reading

The Conquest of Viruses Van G. Wilson, 2025-03-27 This book guides through the fascinating history of viral vaccines from the first primitive smallpox vaccination in the 18th century to the cutting edge RSV formulation approved in 2023 Each chapter delves into the scientific clinical and social forces that led to the development of these life saving medical innovations highlighting the scientists who played pivotal roles With a focus on making complex science accessible and history engaging this book offers a comprehensive portrayal of virology vaccinology and the interplay between science and society in shaping public health Readers will explore key concepts such as the evolution of vaccine technology over time from cowpox material to mRNA vaccines and a wide array of other topics including the eradication of diseases through vaccines the challenges of immunization against influenza and the revolutionary impact of COVID 19 vaccination The author microbiologist Professor Wilson provides expert analysis on how sociological factors influenced vaccine progress and gets to the bottom of the question of why there is still no vaccine for some critical diseases This book is a must read for anyone with an interest in viruses and vaccines Whether you're a

researcher or simply fascinated by medical history this book promises to be both informative and entertaining
