

The background of the slide is a photograph of an industrial facility, likely a refinery or chemical plant. It features a complex network of pipes, structural steel beams, and large storage tanks under a bright, hazy sky. The scene is captured from a low angle, looking up at the industrial structures.

Computer Software Program for On-line Process Control of Production of Portland-cement Concrete Steven A. Ragan, Billy D. Neeley, 1997 This report presents the results of a research program to develop a computer software program SmartPlant which could reduce the cost of concrete mixtures and increase construction productivity by minimizing the adverse effects of materials and mixture variations upon construction operations SmartPlant is comprised of five component programs Most attention was given to seeMIX the mixture proportioning program A laboratory evaluation of this program was conducted in which simulated paving structural and mass concrete mixtures were proportioned using current American Concrete Institute ACI proportioning practices and seeMIX technology Two field evaluations of seeMIX were also conducted SeeMAT A the aggregate database program was also evaluated under field conditions on two occasions SeeMAT C the cement database program and seeMAT P the pozzolan database program were evaluated in the laboratory SeeSTAT the statistical database program was not evaluated The results indicated that seeMIX mixture proportioning technology can proportion concrete mixtures having fresh and hardened properties equal to and in some instances superior to current ACI proportioning practices when richer mixtures such as those used in paving or structural applications are being proportioned SeeMIX was less effective in proportioning lean mass concrete mixtures SeeMAT A seeMAT C and seeMAT P performed well and were judged to be useful tools both as components of SmartPlant and as stand alone tools While the individual components of SmartPlant were evaluated numerous logistical and technical problems prevented the evaluation of a fully automated SmartPlant system either in the laboratory or the field **Chemical Engineering Progress**, 2009

Constructing the Future Ghassan Aouad, Angela Lee, Song Wu, 2006-12-05 This essential book introduces the concept of nD modelling which takes the theory of computer modelling of the built environment to n dimensions nD modelling utilizes a decision support tool for systematic assessment and comparison between various design parameters such as cost

accessibility maintainability sustainability crime energy whole life costing acoustics and scheduling among others

Constructing the Future is a comprehensive book which provides a global perspective on the concept of nD modelling and examines its impact on construction from development to application The text offers a critique of competing views that seek to justify or ignore the role of nD modelling in the future of construction as well as describing developments in this area which are already happening worldwide Presenting a thorough critique of competing views as well as providing guidance on best practice Constructing the Future is a bold well grounded and illustrated title introducing construction management professionals and researchers to this exciting new development in the quest for a single building and product model
