Focus On: 100 Most Popular American Agnostics Wikipedia contributors,

Epidemic Cinema Julia Echeverría, 2023-12-08 This book examines the recent trend in global cinema to feature infectious disease As the global crisis of the COVID 19 pandemic materialised the anxieties and discourses of world risk that had long been portrayed in popular media the book provides a novel definition of the epidemic film genre and offers a systematic look into the narrative and stylistic conventions that characterise it Epidemic Cinema traces the evolution of the genre from its early cinematic origins to establish the founding principles of a genre standing at the crossroads between science fiction and horror It draws on close textual analysis to show how the pandemic reified one of the central predicaments of epidemic narratives the constant tension existing between free floating phenomena and the impulse to control and resist such phenomena ultimately epitomised by the trope of the border Showing how infectious diseases offer a rich allegorical frame which cinema uses to articulate timely anxieties of growingly invisible and deterritorialised risks the author presents the prevalence of contagion in popular culture as a symptom of this growingly viral and virus ridden context both in its most literal and metaphorical sense This insightful study will interest students and scholars of film studies global cinema science fiction horror popular culture and genre theory

Empire of the Beetle Andrew Nikiforuk, 2011 Beginning in the late 1980s a series of improbable bark beetle outbreaks unsettled iconic forests and communities across western North America An insect the size of a rice kernel eventually killed more than 30 billion pine and spruce trees from Alaska to New Mexico Often appearing in masses larger than schools of killer whales the beetles engineered one of the world's greatest forest die offs since the deforestation of Europe by peasants between the eleventh and thirteenth centuries The beetle didn't act alone Misguided science out of control logging bad public policy and a hundred years of fire suppression created a volatile geography that released the world's oldest forest manager from all natural constraints Like most human empires the beetles exploded wildly and then crashed leaving in their wake grieving

landowners humbled scientists hungry animals and altered watersheds Although climate change triggered this complex event human arrogance assuredly set the table With little warning an ancient insect pointedly exposed the frailty of seemingly stable manmade landscapes And despite the billions of public dollars spent on control efforts the beetles burn away like a fire that can't be put out Drawing on first hand accounts from entomologists botanists foresters and rural residents award winning journalist Andrew Nikiforuk investigates this unprecedented beetle plague its startling implications and the lessons it holds

For Emma Ewan Morrison, 2025-06-17 A year after Emma Henson a young genius bio tech scientist dies in a covert AI brain chip experiment her father Josh has nothing left to live for and vows to get revenge on the Silicon Valley CEO responsible Josh has thirty days to make his home made bombs and to say goodbye to his life To give himself courage in the countdown he records daily video messages to his lost Em He is fueled by the horrific memories of Emma's death her body and brain devoured by the AI infinity system in its quest for immortality Memories flood him as he searches for the moments in Emma's short life where he could have been a better father and saved her As he grapples with constructing and testing his DIY bombs his thirty days start to run out and Emma's voice returns to him speaking with him as he sets to complete his mission He worries that he's gone insane he doubts if he can see the violent act through but Emma's voice insists he continue on his path toward murder and mayhem Josh tries to resist his daughter's voice as it attempts to take full control of his body But is it even her Or is it a ghost a psychotic delusion or the AI system that is controlling him Inspired by the real life Brain Chip Implant experiments Musk Neuralink and the technogothic tradition Frankenstein Dr Jekyll and Mr Hyde The Island of Dr Moreau For Emma is a tale of possession by a new force unleashed by science It is a warning for the future but also an intimate heart breaking study of the love between a father and daughter and of the madness that grief can drive us to

Emerging Viruses Leonard G. Horowitz, 1997 Horowitz public health author presents thoroughly researched information in his exploration into the origins of the HIV and Ebola viruses His bias toward the theory that HIV was introduced into the general population by vaccine experiments conducted in New York City and Africa is apparent He generalizes from this thesis that the AIDS epidemic may have been deliberately deployed as a genocide tactic as part of the CIA foreign policy activity in Central Africa The volume is characteristic of a conspiracy genre and as such presents its facts with an eye toward a predisposed conclusion Annotation copyright by Book News Inc Portland OR

Patient Zero and the Making of the AIDS Epidemic Richard A. McKay, 2017-11-22 Now an award winning documentary feature film The search for a patient zero popularly understood to be the first person infected in an epidemic has been key to media coverage of major infectious disease outbreaks for more than three decades Yet the term itself did not exist before the emergence of the HIV AIDS epidemic in the 1980s How did this idea so swiftly come to exert such a strong grip on the scientific media and popular consciousness In Patient Zero Richard A McKay interprets a wealth of archival sources and interviews to demonstrate how this seemingly new concept drew upon centuries old ideas and fears about contagion and social disorder McKay presents a carefully documented and sensitively written account of the life of Ga tan Dugas a gay man whose skin cancer diagnosis in 1980 took on very different meanings as the HIV AIDS epidemic developed and who received widespread posthumous infamy when he was incorrectly identified as patient zero of the North American

outbreak McKay shows how investigators from the US Centers for Disease Control inadvertently created the term amid their early research into the emerging health crisis how an ambitious journalist dramatically amplified the idea in his determination to reframe national debates about AIDS and how many individuals grappled with the notion of patient zero adopting challenging and redirecting its powerful meanings as they tried to make sense of and respond to the first fifteen years of an unfolding epidemic With important insights for our interconnected age Patient Zero untangles the complex process by which individuals and groups create meaning and allocate blame when faced with new disease threats What McKay gives us here is myth smashing revisionist history at its best
